Knowledge Intensive Business Services and Regional Competitiveness João J. M. Ferreira, Mário L. Raposo, Cristina I. Fernandes, Marcus Dejardin, 2016-04-20 Research interest in the service sector has boomed in recent years as deindustrialisation became entrenched Instead of being regarded as merely supplementary to traditional industry and manufacturing services have generated progressively rising levels of growth in developed economies while at the same time coming to be recognised as major drivers of innovation Among the factors which have helped service companies notch up swifter growth rates than all other sectors are the outsourcing of such services by other sectors including the development of information and communication technologies and changes to the regulatory legal and market frameworks as well as globalisation and internationalisation The result is a cluster of highly innovative firms which can loosely be grouped under the heading of Knowledge Intensive Business Services KIBS Knowledge Intensive Business Services and Regional Competitiveness charts the development of these firms and explores their success through four mutually linked parts KIBS and industrial dynamics KIBS and their context KIBS and their contribution to regional competitiveness and economic development and finally KIBS and public policy This book is suitable for researchers and policy makers interested in the rise of these influential actors and their influence on regional competitiveness

Innovation and Employment in Services Johanna Nählinder, 2005-10-07 This is a study of innovation in Knowledge Intensive Business Services KIBS and the impact innovation has on employment The thesis relies on theories within the fields of innovation in services in particular KIBS and innovation and employment taking as its point of departure the taxonomy of product and process innovation The thesis is based on a discussion of innovation in services with a focus on how innovation in services may be understood and delineated A long discussion is dedicated to the taxonomy of product and process innovation

and the extent to which these concepts may be applicable to innovation in services The thesis also scrutinises the concept of KIBS and how this can be defined It further discusses features commonly associated with KIBS firms The thesis is also rooted in the broader issue of innovation as a creator and destroyer of employment and makes a contribution in applying these issues to service sectors The empirical part of the thesis builds on a database compiled for the research project comprised of 967 Swedish KIBS firms The database covers issues of innovation employment and characteristics of the firm The findings indicate that innovation was common in Swedish KIBS firms and that innovations often had an impact on employment However the thesis did not detect a straightforward relation between type of innovation technological process innovation organisational process innovation goods product innovation and service product innovation and the impact on employment Explanations other than type of innovation have to be considered to analyse the impact of innovation on employment The thesis further suggests that although innovation in KIBS is common innovation itself is difficult to conceptualise and delineate
