Great Deep The Sea And Its Thresholds:

The Great Deep James Hamilton-Paterson, 1992 Discusses the islands coasts reefs abyssal depths and ways the oceans work in people's imagination Encyclopedia of American Literature of the Sea and Great Lakes Jill B. Gidmark, 2000-11-30 The sea and Great Lakes have inspired American authors from colonial times to the present to produce enduring literary works This reference is a comprehensive survey of American sea literature The scope of the encyclopedia ranges from the earliest printed matter produced in the colonies to contemporary experiments in published prose poetry and drama The book also acknowledges how literature gives rise to adaptations and resonances in music and film and includes coverage of nonliterary topics that have nonetheless shaped American literature of the sea and Great Lakes The alphabetical arrangement of the reference facilitates access to facts about major literary works characters authors themes vessels places and ideas that are central to American sea literature Each of the several hundred entries is written by an expert contributor and many provide bibliographical information While the encyclopedia includes entries for white male canonical writers such as Herman Melville and Jack London it also gives considerable attention to women at sea and to ethnically diverse authors works and themes The volume concludes with a chronology and a list of works for further reading *Liturgical Spirituality* Philip H. Pfatteicher, 1997-04-01 Well known liturgical scholar and writer Philip Pfatteicher turns his attention in this book to liturgical spirituality as distinct from liturgy and spirituality which assumes two essentially separate disciplines Liturgical spirituality is a holistic concept bringing together both liturgy and spirituality with reference to the interior life of the spirit that is formed and nurtured by the church's liturgy Pfatteicher acknowledges that there are other kinds of spirituality that appear to flourish apart from and in addition to the liturgy for example the spirituality of the desert ascetics of the early centuries of christianity the devotion of the Religious Society of Friends and many forms of meditation and spiritual discipline such as the Spiritual Exercise of Ignatius Loyola The focus of the present volume however is on the spiritual life as formed by the liturgy the ordered form of Christian worship East and West Catholic and Protestant In addition to the form of worship one might experience on a Sunday morning Liturgical Spirituality guides the reader through and into the experience of daily prayer the Easter Vigil the Church Year the Eucharist hymns and music Baptism and even church architecture as hallowing space In 1955 Louis Bouyer published an admirable study entitled Liturgical Piety written before Vatican II and its far reaching reforms that fundamentally changed the entire Western church Philip Pfatteicher has now taken up the challenge of expanding upon Bouyer with a current and invigorating study not of liturgical piety but of liturgical spirituality Philip Pfatteicher is Professor of English at East Stroudsburg University in Pennsylvania a frequent writer and lecturer on liturgical issues and author of A Dictionary of Liturgical Terms and The School of the Church Worship and Christian Formation both published by Trinity Press **The Spectacle of Skill** Robert Hughes, 2015-11-17 I am completely an elitist in the cultural but emphatically not the social sense I prefer the good to the bad the articulate to the mumbling the aesthetically developed

to the merely primitive and full to partial consciousness I love the spectacle of skill whether it s an expert gardener at work or a good carpenter chopping dovetails I don t think stupid or ill read people are as good to be with as wise and fully literate ones I would rather watch a great tennis player than a mediocre one Consequently most of the human race doesn t matter much to me outside the normal and necessary frame of courtesy and the obligation to respect human rights I see no reason to squirm around apologizing for this I am after all a cultural critic and my main job is to distinguish the good from the second rate Robert Hughes wrote with brutal honesty about art architecture culture religion and himself He translated his passions of which there were many both positive and negative brilliantly convincingly and with vitality and immediacy always holding himself to the same rigorous standards of skill authenticity and significance that he did his subjects There never was and never will be again a voice like this In this volume that voice rings clear through a gathering of some of his most unforgettable writings culled from nine of his most widely read and important books This selection shows his enormous range and gives us a uniquely cohesive view of both the critic and the man Most revealing and most thrilling for Hughes s legions of fans are the never before published pages from his unfinished second volume of memoirs These last writings show Robert Hughes at the height of his powers and can be read only with pleasure and a tinge of sadness that his extraordinary voice is no longer here to educate us as well as to clarify and define our world

Sea Fortune Burkhardt Wolf,2020-10-12 Sea fortune has always been an issue of good faith and good navigation While in antiquity fortuna gubernatrix was praised for shielding the seaborne trade in the Renaissance fortuna symbolized the conquest of chance and danger Under such auspices while relying on risk technologies modern seafaring has never lost its adventurous dimension Understanding their origin remains a challenge for the history of science and the history of literature

The Long Way Home John Demont,2017-10-03 The province s premier journalist tells the story he was born to write No journalist has travelled the back roads hidden vales and fog soaked coves of Nova Scotia as widely as John DeMont No writer has spent as much time considering its peculiar warp and weft of humanity geography and history The Long Way Home is the summation of DeMont s years of travel research and thought It tells the story of what is from the European view of things the oldest part of Canada Before Confederation it was also the richest but now Nova Scotia is among the poorest Its defining myths and stories are mostly about loss and sheer determination Equal parts narrative memoir and meditation The Long Way Home chronicles with enthralling clarity a complex and multi dimensional story the overwhelming of the first peoples and the arrival of a m lange of pioneers who carved out pockets of the wilderness the random acts and unexplained mysteries the

shameful achievements and noble failures the rapture and misery the twists of destiny and the cold heartedness of fate This is the biography of a place that has been hardened by history A place full of reminders of how great a province it has been and how great with the right circumstances and a little luck it could be again **Sounding the Limits of Life** Stefan Helmreich, 2015-10-27 What is life What is water What is sound In **Sounding the Limits of Life** anthropologist Stefan Helmreich investigates how contemporary scientists biologists oceanographers and audio engineers are redefining these crucial concepts Life water and sound are phenomena at once empirical and abstract material and formal scientific and social In the age of synthetic biology rising sea levels and new technologies of listening these phenomena stretch toward their conceptual snapping points breaching the boundaries between the natural cultural and virtual Through examinations of the computational life sciences marine biology astrobiology acoustics and more Helmreich follows scientists to the limits of these categories Along the way he offers critical accounts of such other than human entities as digital life forms microbes coral reefs whales seawater extraterrestrials tsunamis seashells and bionic cochlea He develops a new notion of sounding as investigating fathoming listening to describe the form of inquiry appropriate for tracking meanings and practices of the biological aquatic and sonic in a time of global change and climate crisis **Sounding the Limits of Life** shows that life water and sound no longer mean what they once did and that what count as their essential natures are under dynamic revision

A Short History of Nearly Everything Bill Bryson, 2012-05-15 Bill Bryson's quest to understand everything that has happened in the history of the earth from the Big Bang theory to the rise of civilization and beyond revised to reflect the last two decades of scientific advancement How did we get from being nothing at all to where we are today How did the age of the dinosaurs eventually give way to the age of the iPhone In this completely revised update to the international phenomenon **A Short History of Nearly Everything** Bill Bryson returns to answer these questions and many more Bryson brings a groundbreaking account of life itself to a new generation of readers and wonderers as he takes subjects often passed off as boring and incomprehensible and renders them accessible fascinating and outright amusing to anyone who's ever wondered about the world around them Introducing readers to a long list of the world's most impressive archaeologists paleontologists physicists astronomers anthropologists and mathematicians from their offices and laboratories to dig sites and field camps Bryson embarks on a journey to discover answers to the biggest questions about the universe and ourselves **A Short History of Nearly Everything 2.0** is a profoundly enlightening surprisingly humorous and charmingly clever adventure into the realm of human knowledge as only Bryson can render it His revamped **Short History** is a thrilling journey through time and space and his writing will make readers both new and old see the world in a whole new way **Chasing the Sun** Richard Cohen, 2011-08-04 The Sun is so powerful so much bigger than us that it is a terrifying subject Yet though we depend on it we take it for granted Amazingly the first book of its kind **CHASING THE SUN** is a cultural and scientific history of our relationship with the star that gives us life Richard Cohen applying the same mix of wide ranging reference and intimate

detail that won outstanding reviews for *By the Sword* travels from the ancient Greek astronomers to modern day solar scientists from Stonehenge to Antarctica site of the solar eclipse of 2003 when penguins were said to sing Mexico's Aztecs to the Norwegian city of Tromsø where for two months of the year there is no Sun at all He introduces us to the crucial sunspot cycle in modern economics the religious dances of Indian tribesmen the histories of sundials and calendars the plight of migrating birds the latest theories of global warming and Galileo recording his discoveries in code for fear of persecution And throughout there is the rich Sun literature from the writings of Homer through Dante and Nietzsche to Keats Shelley and beyond Blindingly impressive and hugely readable this is a tour de force of narrative non fiction

Simulation and Its Discontents Sherry Turkle, 2022-11-01 How the simulation and visualization technologies so pervasive in science engineering and design have changed our way of seeing the world Over the past twenty years the technologies of simulation and visualization have changed our ways of looking at the world In *Simulation and Its Discontents* Sherry Turkle examines the now dominant medium of our working lives and finds that simulation has become its own sensibility We hear it in Turkle's description of architecture students who no longer design with a pencil of science and engineering students who admit that computer models seem more real than experiments in physical laboratories Echoing architect Louis Kahn's famous question What does a brick want Turkle asks What does simulation want Simulations want even demand immersion and the benefits are clear Architects create buildings unimaginable before virtual design scientists determine the structure of molecules by manipulating them in virtual space physicians practice anatomy on digitized humans But immersed in simulation we are vulnerable There are losses as well as gains Older scientists describe a younger generation as drunk with code Young scientists engineers and designers full citizens of the virtual scramble to capture their mentors' tacit knowledge of buildings and bodies From both sides of a generational divide there is anxiety that in simulation something important is slipping away Turkle's examination of simulation over the past twenty years is followed by four in depth investigations of contemporary simulation culture space exploration oceanography architecture and biology

New Orleans in the Atlantic World William Boelhower, 2013-09-13 The thematic project *New Orleans in the Atlantic World* was planned immediately after hurricane Katrina and focuses on what meteorologists have always known the city's identity and destiny belong to the broader Caribbean and Atlantic worlds as perhaps no other American city does Balanced precariously between land and sea the city's geohistory has always interwoven diverse cultures languages peoples and economies Only with the rise of the new Atlantic Studies matrix however have scholars been able to fully appreciate this complex history from a multi disciplinary multilingual and multi scaled perspectivism In this book historians geographers anthropologists and cultural studies scholars bring to light the atlanticist vocation of New Orleans and in doing so they also help to define the new field of Atlantic Studies This book was published as a special issue of *Atlantic Studies*

[The Boilerplate Rhino](#) David Quammen, 2012-10-23 From one of the most fascinating and thought provoking writers of natural history *The Seattle Times* a collection of enduring

essays that form a bestiary of wondrous creatures and a gallery of the human faces that peer at them The Boilerplate Rhino brings together twenty six of David Quammen s most thoughtful and engaging essays from his column for Outside magazine gifting readers with an irrepressible assortment of ideas to explore conundrums to contemplate and wondrous creatures to behold In lucid penetrating and often quirkily idiosyncratic prose David Quammen takes his readers with him as he explores the world His travels lead him to rattlesnake handlers in Texas a lizard specialist in Baja the dinosaur museum in Jordan Montana and halfway across Indonesia in search of the perfect Durian fruit He ponders the history of nutmeg in the southern Moluccas meditates on bioluminescent beetles while soaking in the waters of the Amazon and delivers The Dope on Eggs from a chicken ranch near his hometown in Montana Quammen s travels are always jumping off points to explore the rich and sometimes horrifying tension between humankind and the natural world in all its complexity and ambivalence The result is another irrepressible assortment of ideas to explore conundrums to contemplate and wondrous creatures to behold

War, Science and Terrorism Dr J Richardson,2012-12-06 Describes the application of research to the evolution of weapons It shows how natural engineering information and environmental sciences are exploited how even social science is applied to recruitment battlefield and logistical management and careful preparation of terroristic acts **Why Hope?** John Zerzan,2015-10-19 The infamous eco anarchist John Zerzan whose books have resulted in recent interviews by Vice and Believer magazines checks in with further provocative articles about the chaotic results of civilization and technology Says novelist Lang Gore in his introduction The present collection of essays continues the overarching thrust of John s scholarship unveiling the post apocalyptic nature of our times by noting the apocalypse was yesterday several thousand years ago to be precise and that nothing produced by civilization can ever redeem the systematic attempt it has undertaken these very few millennia to destroy or alienate any human connection with the earth In fact when civilized Europeans imposed themselves everywhere on Earth they created a terminal crisis for themselves by their very contact with indigenous societies Suddenly those with eyes to see and ears to hear could recognize that patriarchy property and authority and certainly slavery were neither necessary nor desirable let alone determined by human nature *Romantic Geography* Yi-Fu Tuan,2013 Geography is useful indeed necessary to survival Everyone must know where to find food water and a place of rest and in the modern world all must make an effort to make the Earth our home habitable But much present day geography lacks drama with its maps and statistics descriptions and analysis but no acts of chivalry no sense of quest Not long ago however geography was romantic Heroic explorers ventured to forbidding environments oceans mountains forests caves deserts polar ice caps to test their power of endurance for reasons they couldn t fully articulate Why climb Everest Because it is there In this book the author considers the human tendency stronger in some cultures than in others to veer away from the middle ground of common sense to embrace the polarized values of light and darkness high and low chaos and form mind and body In so doing venturesome humans can find salvation in geographies that cater not so much to survival needs or even to good comfortable

living as to the passionate and romantic aspirations of their nature **Threshold: Aperture to the Light of the World ,**

Reading Underwater Wreckage Killian Quigley, 2022-12-15 Presenting a novel and needed theoretical model for interpreting shipwrecks and other drowned fragments the histories they tell and the futures they presage as junctures of artefact and ecofact human remains and emergent ecologies this book puts the environmental humanities and particularly multispecies studies in close conversation with literary studies history and aesthetic theory Earth's oceans hold the remains of as many as three million shipwrecks some thousands of years old Instead of approaching shipwrecks as either artefacts or ecofacts this book presents a third frame for understanding one inspired by the material dynamism of sea floor stuff As they become encrusted by oceanic matter some of it living some inanimate anthropic fragments participate in a distinctively submarine form of material relation That relation comprises a wide and sometimes incalculable array of things lives times and stories Drawing from several centuries of literary philosophical and scientific encounters with encrustations as well as from some of the innumerable encrusted art forms that inhabit the sea floor this book serves anyone in search of better ways to perceive describe and imagine submarine matters *The Blue Frontier* Ronald C.
