*Social Stratification in Contemporary China* Li Qiang, 2016-03-31 Social Stratification in Contemporary China raises and debates major sociological issues of modern and present day China from a historical perspective. Such topics as equality and inequality and acceptability of defined inequality have been dealt with in a broad historical context since 1949 when the People's Republic was founded. The work is widely accepted as one of the most important studies trying to clarify the difficult perceptions of policy of reform and opening up that was formulated and implemented in the early 1980s in China. Professor Li Qiang is one of the leading sociologists in China.

**The Rise of Neo-liberalism and the Decline of Freedom** Birsen Filip, 2020-12-01 This book examines the relationship that prevails between the state and freedom in the works of Milton Friedman and Friedrich Hayek as well as those of some of their peers including Gary Becker James Buchanan and George Stigler. The author explains that their concept of freedom was largely derived from the principles and values of neo liberalism. However she maintains that neo liberals never cared about providing the masses with genuine freedom rather they value freedom for its instrumental value in terms of facilitating the global spread of free market capitalism. The author explains that the neo liberal concept of freedom has been a very useful tool in promoting the superiority of free market capitalism over centrally planned economies aimed at achieving the common good. She argues that even though neo liberals are strongly opposed to central planning they are tolerant of state planning intended to help establish and sustain the conditions of a free market system. She also contends that the extensive implementation of neo liberal reforms and policies has led to states losing their sovereignty and moving away from their traditional role of achieving the common good. The author claims that the world has essentially become the sum of many neo liberal societies particularly during the last four decades. She also maintains that throughout human history no other ideology school of thought political religious or military institution kingdom or empire has been as successful as neo liberalism when it comes to shaping people's beliefs ideals goals and lifestyle on a global scale. Unfortunately neo liberalism has proven to be very detrimental for civilization and the future of the planet. The author concludes that the widespread adoption of the neo liberal concept of freedom in combination with the pretense that economics is a natural ahistorical and value free science has triggered the emergence of methodological monism which has resulted in unfreedom and the poverty of economics while also delaying the progress of the entire discipline.

*Contemporary Issues in Heterodox Economics* Arturo Hermann, Simon Mouatt, 2020-10-07 Heterodox economics can provide a more complete and

robust explanation of economic realities than orthodox or mainstream economics Contemporary Issues in Heterodox Economics Implications for Theory and Policy Action argues that this greater explanatory power gives heterodox economics the ability to illuminate appropriate policy for the major crises of our time as well as proffer the basis for a more rounded pluralist approach to economic theory The chapters in this wide ranging volume address some of the key issues facing the global economy including the growing disparity of income wealth between persons and economic areas environmental degradation issues associated with employment and the regularity of economic financial crises The authors examine potential policy responses such as modern monetary theory models of public ownership and the need to move beyond standard concepts of growth They also explore the deficiencies of orthodox economics and contend that a more pluralist approach to economics is required in the public sphere in academia and in the classroom in order to help face the challenges of the twenty first century This book is invaluable reading for students and scholars across the social sciences who are interested in alternatives to mainstream economic thinking    *More Heat Than Light* Philip Mirowski,1991-11-29 The development of the energy concept in Western physics and its subsequent effect on the emergence of neoclassical economics are traced to reveal how economics has sought to emulate physics especially with regard to the theory of value
