**Greening Brownfields** William Sarni, 2010      *Sustainable Brownfield Development* Christopher De Sousa, 2021-07-14

While industrial and chemical innovations have contributed extensively to human advancement the darker part of their legacy has been the hundreds of thousands of polluted sites left behind Governments at all levels have rallied to support the remediation and reuse of these land resources and put many of the nation's brownfields back into productive use This book presents two dozen brownfield projects in the United States that have incorporated sustainability highlighting project features best management practices and lessons from the field regarding the underlying policies and practices that enabled these projects to be completed or in some cases stalled altered or abandoned The case studies represent an array of brownfield projects that aimed to go beyond conventional practice and include a range and variety of end uses e.g. corner gas stations industrial office residential brightfields green space mixed use and transit oriented developments The cases investigate site histories planning and development and examine sustainability characteristics to understand how projects overcame the barriers to brownfield reuse and the implementation of sustainability features and derive a series of lessons learned including innovative policies programs and or funding mechanisms that helped make these projects work *Sustainable Brownfield Development* will be of interest to developers planners consultants and community representatives interested in environmental policy urban planning community development ecological restoration economic development and parks planning by providing direction and inspiration for those eager to erase the blight of the past and build a more sustainable future      **Sustainable Brownfield Regeneration** Tim Dixon, Mike Raco, Philip Catney, David N. Lerner, 2008-04-15

*Sustainable Brownfield Regeneration* presents a comprehensive account of UK policies processes and practices in brownfield regeneration and takes an integrated and theoretically grounded approach to highlight best practice Brownfield regeneration has become a major policy driver in developed countries It is estimated that there are 64 000 hectares of brownfield land in England much of which presents severe environmental challenges and lies alongside some of the most deprived communities in the country Bringing such land back into active use has taken on a new urgency among policymakers developers and other stakeholders in the development process Frequently however policy thinking and practice has been underpinned by silo mentalities in which integrated and multidisciplinary approaches to problem solving have been limited The book has two principal aims The first is to examine the ways in which science and social science research disciplines can be brought together to help solve important brownfield regeneration issues with a focus on the UK The second is to assess the efficiency and effectiveness of different types of regeneration policy and practice and to show how liveable spaces can be produced from problem places The Thames Gateway in the south of England and Greater Manchester in the North of England are shown as examples of how brownfield regeneration projects are developing in an era where sustainability is high on the policy agenda From the Foreword by Paul Syms National Brownfield Advisor English Partnerships Ensuring the effective and

efficient reuse of brownfield land is an essential part of the British Government's land use policies in support of sustainable communities. This book recognises that reusing brownfield land is not just about overcoming technical issues to remove contamination or other physical problems with the ground. It highlights the importance of engaging with the many different stakeholders whose opinions and concerns need to be taken into account if sustainable outcomes are to be achieved. The authors also recognise that brownfield land reuse is not just about building new homes or places of employment; the creation of new green spaces can be just as important.

**Green Issues and Debates** Howard S. Schiffman, 2011-06-28 Colorful bracelets, funky brooches and beautiful handmade beads: young crafters learn to make all these and much more with this fantastic step-by-step guide. In 12 exciting projects with simple steps and detailed instructions, budding fashionistas create their own stylish accessories to give as gifts or add a touch of personal flair to any ensemble. Following the successful Art Smart series, Craft Smart presents a fresh, fun approach to four creative skills: knitting, jewelry making, papercrafting and crafting with recycled objects. Each book contains 12 original projects to make using a range of readily available materials. There are projects for boys and girls carefully chosen to appeal to readers of all abilities. A special techniques and materials section encourages young crafters to try out their own ideas while learning valuable practical skills.

**Achieving Sustainability in Ukraine through Military Brownfields Redevelopment** Cezar Morar, Laurel Berman, Serap Erdal, Liudmyla Niemets, 2024-12-30 This book is written by international experts who are brownfields practitioners from over 15 countries. Blighted and contaminated properties including military, industrial, commercial and multi-residential properties globally referred to as brownfields are a shared phenomenon among NATO and NATO partner countries. They provide practical solutions to addressing, evaluating and cleaning up brownfields, including multiple case studies. Topics include reuse of military brownfields, sustainable site reuse, community engagement, risk assessment, impacts of the war in Ukraine related to military brownfields, development and redevelopment, a free training to improve capacity to evaluate environmental and health risks of brownfields and shared best practices.

*Building Systems Integration for Enhanced Environmental Performance* Shahin Vassigh, Jason R. Chandler, 2011 Looks at the issues of sustainability and environmental impact in the field of building design and architecture. This book addresses sustainability in building design through development of a series of examples presented as three-dimensional models of well-integrated building systems.

**Metropolitan Sustainability** F. Zeman, 2012-09-11 Global populations have grown rapidly in recent decades, leading to ever-increasing demands for shelter, resources, energy and utilities. Coupled with the worldwide need to achieve lower impact buildings and conservation of resources, the need to achieve sustainability in urban environments has never been more acute. This book critically reviews the fundamental issues and applied science, engineering and technology that will enable all cities to achieve a greater level of metropolitan sustainability and assist nations in meeting the needs of their growing urban populations. Part one introduces key issues related to metropolitan sustainability, including the use of both urban metabolism and benefit-cost

analysis Part two focuses on urban land use and the environmental impact of the built environment The urban heat island effect redevelopment of brownfield sites and urban agriculture are discussed in depth before part three goes on to explore urban air pollution and emissions control Urban water resources reuse and management are explored in part four followed by a study of urban energy supply and management in part five Solar wind and bioenergy the role of waste to energy systems in the urban infrastructure and smart energy for cities are investigated Finally part six considers sustainable urban development transport and planning With its distinguished editor and international team of expert contributors Metropolitan sustainability is an essential resource for low impact building engineers sustainability consultants and architects town and city planners local municipal authorities and national and non governmental bodies and provides a thorough overview for academics of all levels in this field Critically reviews the fundamental issues and applied science engineering and technology that will enable all cities to achieve a greater level of metropolitan sustainability Will assist nations in meeting the needs of their growing urban populations Chapters discuss urban land use the environmental impact of the build environment the urban heat island effect urban air pollution and emissions control among other topics

**Urban Sustainability and Energy Management of Cities for Improved Health and Well-Being** González-Lezcano, Roberto Alonso, 2022-04-29 Global

environmental challenges such as climate change rapid urbanization and human influence on the environment continue to grow Many of these resulting risks lead to diseases and negative impacts on health and quality of life It is now essential to develop more sustainable and healthy environments with greater focus on prevention by targeting the root causes of disease Urban communities comprise a high concentration of services consumption and waste and represent an unsustainable pattern of urbanization that accelerates the decline of global ecosystems services rather than supporting them through the compensatory contributions of peri urban and rural areas By focusing on reducing environmental and social risk factors almost a quarter of the global burden of disease can be avoided through better health promotion strategies and improved prevention and hygiene measures Urban Sustainability and Energy Management of Cities for Improved Health and Well Being highlights the interdisciplinary connections between the environment and human health focusing on new ideas and suggestions for promoting both sustainable development and human health and well being It creates a new approach to the analysis of human impacts on the natural environment and conversely determines how the environment can modulate human lifestyles and health Furthermore this book explores opportunities and challenges urban communities face as they seek to become sustainable systems embedded in their diverse and complex social and environmental contexts Covering topics such as affordable housing ecological waste materials and urban health this premier reference source is an essential resource for environmentalists civil engineers government officials architects libraries students and educators of higher education urban planners researchers and academicians

The Oxford Handbook of Land Economics Joshua M. Duke, JunJie Wu, 2014-05

Land use change is one of the most pervasive socioeconomic forces affecting ecological systems economic systems and

human wellbeing This Oxford Handbook draws on recent advances in several economic fields that investigate land use behavior making this a must read for those who want to understand the frontier of land economics Accelerating the Socio-Ecological Transition Mohamed Cheriet, Jean-François Boucher, Luciana Gondim de Almeida Guimarães, Jean-Marc Frayret, 2025-06-09 This book explores the key principles and challenges of implementing the socio ecological transition with a particular focus on Quebec Canada It addresses these issues from both research and educational perspectives offering actionable strategies to accelerate this transition across the province s various economic sectors The book s structure aligns with the CIRODD Interdisciplinary Research Center for Operationalization of Sustainable Development scientific program organized into two major sections and 11 thematic areas The objective is to showcase the latest advancements in socio ecological transition drawing on a decade of research contributions from CIRODD This book edition will highlight key innovations emerging trends and impactful solutions that have shaped the field demonstrating CIRODD s pivotal role in driving sustainable transformation Section 1 delves into practical interventions and strategies for citizen engagement exploring transition initiatives urban planning and collaborative knowledge building models It brings together theoretical practical and experiential insights emphasizing the vital role of research and the arts in facilitating the socio ecological transition Section 2 equips readers with the necessary tools to support this transition offering models and methods for analyzing complex systems It highlights innovative digital approaches for developing circular and sustainable business models This is an open access book *Greening Brownfields* William Sarni, 2000 *Urban Redevelopment* Barry Hersh, 2017-08-29 Urban redevelopment plays a major part in the growth strategy of the modern city and the goal of this book is to examine the various aspects of redevelopment its principles and practices in the North American context *Urban Redevelopment A North American Reader* seeks to shed light on the practice by looking at both its failures and successes ideas that seemed to work in specific circumstances but not in others The book aims to provide guidance to academics practitioners and professionals on how when where and why specific approaches worked and when they didn t While one has to deal with each case specifically it is the interactions that are key The contributors offer insight into how urban design affects behavior how finance drives architectural choices how social equity interacts with economic development how demographical diversity drives cities growth how politics determine land use decisions how management deals with market choices and how there are multiple influences and impacts of every decision The book moves from the history of urban redevelopment The City Beautiful movement grand concourses and plazas through urban renewal superblocks and downtown pedestrian malls to today s place making transit oriented design street quieting new urbanism publicly accessible softer waterfront design funky small urban spaces and public private megaprojects This history also moves from grand masters such as Baron Haussmann and Robert Moses through community participation to stakeholder involvement to creative local leadership The increased importance of sustainability high energy performance resilience and both pre and post catastrophe

planning are also discussed in detail Cities are acts of man not nature every street and building represents decisions made by people Many of today s best recognized urban theorists look for great forces economic trends technological shifts political movements and try to analyze how they impact cities One does not have to be a subscriber to the great man theory of history to see that in urban redevelopment successful project champions use or sometimes overcome overall trends using the tools and resources available to rebuild their community This book is about how these projects are brought together each somewhat differently by the people who make them happen

**Greening Africana Studies** Rubin Patterson,2015-01-30

Insufficient attention has been given to the environment in Africana studies within the academy In Greening Africana Studies Rubin Patterson initiates an important conversation explaining why and how the gap between these two disciplines can and should be bridged His comprehensive book calls for a green African transnationalism and focuses on the mission and major paradigms that identify the respective curriculum research interests and practices In his original work Patterson demonstrates the ways in which black communities are harmed by local environmental degradation and global climate change He shows that many local unwanted land use sites LULUs such as brownfields and toxic release inventory facilities are disproportionately located in close proximity to neighborhoods of color but also to colleges and universities with Africana studies programs Arguing that such communities are not aggressively engaging in environmental issues Greening Africana Studies also provides examples of how Africana studies students as well as members of black communities can prepare for green careers

**Water Tech** William Sarni,Tamin Pechet,2013-10-08 This book unveils how the world in the twenty first

century will need to manage our most fundamental resource need water It outlines how stakeholders can improve water use in their homes their businesses and the world In particular it focuses on the role of stakeholders in crafting a twenty first century paradigm for water Investors not only drive innovation through direct investment in new technologies but also by highlighting risk and driving reporting and disclosure within the business community Water Tech highlights the business drivers to address water related issues These include business disruption regulatory risk and reputational risk along with opportunities in the commercialization of innovative technologies such as desalination and water reuse and treatment The authors argue that through increased attention on water scarcity through activities such as reporting and disclosure we are now accelerating innovation in the water industry They show how we are just now capturing the true cost and value of water and this is creating opportunities for investors in the water sector The text takes the reader through key aspects of emerging innovative technologies along with case studies and key issues on the path to commercialization A roadmap of the opportunities in the water sector is presented based on interviews with leading authorities in the water field including innovators investors legal regulatory experts and businesses

**Post-Industrial Urban Greenspace** Jennifer Foster,L.

Anders Sandberg,2017-10-02 Post industrial urban spaces typically include abandoned factories disused rail lines old pits and quarries and de commissioned landfills In these places different visions compete for dominance with respect to current and

future land uses Neighbours often view such urban greenspace as polluted unkempt and weedy harbouring undesirable biophysical features and people These are spaces that often become the focus of some form of revitalization reinvestment and restoration From the perspective of civic authorities and urban planners transforming post industrial landscapes into disciplined and tended greenspace creates the urban conditions and signals of popular contemporary taste that attract investors gentrifiers and tourists But post industrial spaces are also places where unique and unpredictable human and ecological associations can emerge spontaneously Such places may contain considerable ecological integrity and biodiversity and host human populations who find a home and respite in such ecologies They also tell stories of an industrial and urban past that should be acknowledged understood and if suitable celebrated This volume explores the environmental justice and injustice dimensions of emerging urban post industrial landscapes including the ecological politics cultural representations and aesthetics of these spaces This book was published as a special issue of *Local Environment*     *Sustainable Remediation of Contaminated Soil and Groundwater* Deyi Hou, 2019-11-23 *Sustainable Remediation of Contaminated Soil and Groundwater* Materials Processes and Assessment provides the remediation tools and techniques necessary for simultaneously saving time and money and maximizing environmental social and economic benefits The book integrates green materials cleaner processes and sustainability assessment methods for planning designing and implementing a more effective remediation process for both soil and groundwater projects With this book in hand engineers will find a valuable guide to greener remediation materials that render smaller environmental footprint cleaner processes that minimize secondary environmental impact and sustainability assessment methods that can be used to guide the development of materials and processes Addresses materials processes and assessment needs for implementing a successful sustainable remediation process Provides an integrated approach for the unitization of various green technologies such as green materials cleaner processes and sustainability assessment Includes case studies based on full scale commercial soil and groundwater remediation projects     **Recent Advances in Sustainable Environment** Krishna R. civil engineering     Greening Cities Puay Yok Tan, Chi Yung Jim, 2017-03-29 This book offers an overview of recent scientific and professional literature on urban greening and urban ecology focusing on diverse disciplines such as landscape architecture geography urban ecology urban climatology biodiversity conservation urban governance architecture and urban hydrology It includes contributions in which academics public policy experts and practitioners share their considerable knowledge on the multi faceted aspects of greening cities The greening of cities has witnessed a global resurgence over the past two decades and has made a significant contribution to urban liveability and sustainability as well as increasing resilience As urban greening efforts continue to expand it is useful to promote recent advances in our understanding of various aspects of planning design and management of urban greenery but at the same time it is also important to realize that there are important gaps in our knowledge and that further research is needed The book is organized in three main parts concepts functions and forms of urban greening The first part examines the historical roots of greening cities and how the burgeoning field of urban ecology can contribute useful principles and strategies to guide the planning design and management of urban greening The second part shifts the focus to the diverse range of services the functions provided by urban greening such as those related to urban climate urban biodiversity human health and community building The final part explores conventional often neglected but important forms of urban greenery such as urban woodlands and urban farms as well as relatively recent forms of urban greenery like those integrated with buildings and waterways It offers a ready reference resource for researchers practitioners and policy makers to grasp the critical issues and trigger further studies and applications in the quest for high performance green cities     Mysterious Abandoned Places Benjamin

Ramirez, AI, 2025-03-31 Mysterious Abandoned Places explores the captivating stories behind forgotten cities decaying theme parks and other crumbling structures It examines the intricate interplay of history architecture and societal shifts that led to their desertion highlighting how these spaces reflect and shape human experience Abandoned places are not just remnants of failure they are archives of human ambition resilience and the unintended consequences of progress For instance the book delves into the economic drivers behind urban decay such as resource depletion that leaves boomtowns desolate The book progresses by examining economic factors and the social ramifications of urban decay the phenomenon of theme park abandonment and the role of geopolitical instability and environmental disasters By presenting rigorous historical research and firsthand accounts this book provides a comprehensive and nuanced understanding of the circumstances surrounding each abandonment This interdisciplinary study connects to fields such as urban planning sociology and environmental studies offering insights into sustainable development and responsible resource management making it a valuable resource for a broad audience     **Sustainable Regeneration of Former Military Sites** Samer Bagaeen, Celia Clark, 2016-06-10

**Sustainable Regeneration of Former Military Sites** is the first book to analyze a profound land use change happening all over the world the search for sustainable futures for property formerly dedicated to national defense now becoming redundant

disposed of and redeveloped The new military necessity for rapid flexible response requires quite different physical resources from the massive fixed positions of the Cold War with huge tracts of land and buildings looking for new uses The transition from military to civilian life for these complex contaminated isolated heritage laden and often contested sites in locations ranging from urban to remote is far from easy There is very little systematic analysis of what follows base closures leaving communities governments developers and planners experimenting with untested land use configurations partnership structures and financing strategies With twelve case studies drawn from different countries many written by those involved Sustainable Regeneration of Former Military Sites enables the diverse stakeholders in these projects to discover unique opportunities for reuse and learn from others experiences of successful regeneration
