Open source tools, free utilities, and snippets of code that can be reused and repurposed to simplify data, natural language processing, and machine translation as a tool to simplify data, and data summarization and visualization, and the role they play in making data useful for the end user. Discusses data simplification principles, methods, and tools that must be studied and mastered. Provides open source tools, free utilities, and snippets of code that can be reused and repurposed to simplify data. Explains how to best utilize indexes to search, retrieve, and analyze textual data.
