**Women in Higher Education** Ana M. Martínez Alemán,Kristen A. Renn,2002-12-13 The only comprehensive encyclopedia on the subject of women in higher education America s first wave of feminists Susan B Anthony

Elizabeth Cady Stanton and others included expanded opportunities for higher education in their Declaration of Sentiments at the first Women's Rights Convention in Seneca Falls New York in 1848. By then the first American institutions to educate women had been founded among them Mt Holyoke Seminary in 1837. However not until after the Civil War did most universities admit women and not for egalitarian purposes. War casualties had caused a drop in enrollment and the states needed teachers. Women students paid tuition but as teachers were paid salaries half that of men. By the late 20th century there were more female than male students of higher education but women remained underrepresented at the higher levels of educational leadership and training. This volume covers everything from historical and cultural context and gender theory to women in the curriculum and as faculty and administrators. *Women in the Judiciary* Ulrike Schultz, Gisela

Shaw, 2013-09-13 Does gender matter in judging? And if so in what way? Why were there so few women judges only two or three decades ago and why are there so many now in most countries of the Western world? How do women judges experience their work in a previously male dominated environment? What are their professional careers? How do they organise and live their lives? And finally and most notably do women judge differently from men or even better? These are the questions dealt with in this collection of contributions by seven authors from six countries: UK, Australia, USA, Canada, Syria and Argentina, contrasting views from common law and civil law countries. In spite of differences in the two legal systems as well as greater gender diversity on the bench and the overall higher income and prestige enjoyed by judges in common law countries, women judges in all these countries share many problems. Diverse and intriguing facets are added to a debate that started thirty years ago but continues to leave ample space for further discussion. This book was originally published as a special issue of *International Journal of the Legal Profession*. **The SAGE Handbook of Qualitative Research** Norman K.

Denzin, Yvonna S. Lincoln, 2011-04-27 Now in its fourth edition this handbook is an essential resource for those interested in all aspects of qualitative research and has been extensively revised and updated to cover new topics including applied ethnography, queer theory and auto ethnography. Women's Health in Africa Chimaraoke Izugbara, Eleanor

Covan, Elizabeth Fugate-Whitlock, 2017-10-02 This edited book includes new policy relevant research on women's health issues in Africa. Scholars explore critical topics from different disciplinary traditions using a variety of research methodologies and data sources. The contributors include African scholars with in depth knowledge of their home contexts who can furnish nuanced interpretations of local health issues and trends, international researchers who bring vigorous comparative viewpoints, emerging scholars adding to scientific knowledge and more established researchers with a deep global knowledge of women's health issues. The range of women's health issues is vast including the HIV epidemic and its impacts, domestic violence, the persistence of homebirths and abortion. In addition the book investigates emerging health concerns such as CVDs and cancers. Readers will learn that while old health issues have persisted and assumed new dimensions, newer concerns have materialized and are gaining momentum. The inability of health systems to tackle these

issues complicates matters in Africa creating a sense of desperation that can only be successfully confronted through strong political will and strategic planning grounded in further research This book was originally published as several special issues of Health Care for Women International

*Indigenous Knowledge* Kai Horsthemke, 2021-01-11 Although the manifestation of what is taken to be indigenous knowledge could presumably be traced back roughly to the origins of humankind the idea of indigenous knowledge is a fairly recent phenomenon It has arguably gained conceptual and discursive currency only over the past half century with a veritable slew of conferences workshops special journal editions and anthologies devoted to the topic Yet there has been no treatise that offers a comprehensive critical examination of this notion Accounts of indigenous knowledge usually focus on explanations of indigenous local traditional African and the like but to date not a single defense of indigenous knowledge has bothered to explain the particular understanding of knowledge the authors are working with Indigenous Knowledge Philosophical and Educational Considerations s critique of the idea of indigenous knowledge should in no way be understood as an endorsement of the evils of colonial conquest and ongoing exploitation oppression and subjugation Nor should it be taken as an indication of a failure on the part of the Kai Horsthemke to sympathize with the struggle of indigenous peoples the world over for a dignified and sustainable way of life for personal and communal space and for self determination The aim of the book is to provide especially indigenous educators with theoretical tools for critical reflection and interrogation of their own and others preconceptions assumptions and epistemic practices and customs

**The Shared Parish** Brett C. Hoover, 2014-08-15 As faith communities in the United States grow increasingly more diverse many churches are turning to the shared parish a single church facility shared by distinct cultural groups who retain their own worship and ministries The fastest growing and most common of these are Catholic parishes shared by Latinos and white Catholics Shared parishes remain one of the few institutions in American society that allows cultural groups to maintain their own language and customs while still engaging

in regular intercultural negotiations over the shared space This book explores the shared parish through an in depth ethnographic study of a Roman Catholic parish in a small Midwestern city demographically transformed by Mexican immigration in recent decades Through its depiction of shared parish life the book argues for new ways of imagining the U S Catholic parish as an organization The parish argues Brett C Hoover must be conceived as both a congregation and part of a centralized system and as one piece in a complex social ecology The Shared Parish also posits that the search for identity and adequate intercultural practice in such parishes might call for new approaches to cultural diversity in U S society beyond assimilation or multiculturalism We must imagine a religious organization that accommodates both the need for safe space within distinct groups and for social networks that connect these groups as they struggle to respectfully co exist

**Gendered Choices** Sue Jackson,Irene Malcolm,Kate Thomas,2011-03-02 This important book breaks new ground in addressing issues of gendered learning in different contexts across the adult life span at the start of the 21st century Adult learning sits within a shifting landscape of educational policy profoundly influenced by the skills agenda by complex funding policies new qualifications and the widening narrowing participation debate The book is unique in highlighting the centrality of gendered choices to these developments which shape participation in and experiences of lifelong learning Gendered Choices critically examines the continued expansion of a skills based approach in areas of lifelong learning including career decisions professional identities and informal networks It explores key intersections of adult learning from a gender perspective notably participation workplace learning and informal pathways Drawing on research from a range of contexts Gendered Choices demonstrates that for women the public private spaces of work and home are often conflated although the gendering of choice has largely been ignored by policy makers The themes of the book bring together some of these critical issues explored through the multiple and fractured identities which constitute gendered lives The book addresses these in an international context with contributions from Canada Spain and Iran that provide a wider international perspective on shared issues

**Handbook of Adult Development** Jack Demick,Carrie Andreoletti,2012-12-06 This volume is an outgrowth of contemporary research on development over the adult lifespan which by now has burgeoned and developed both nationally and internationally However for us the impetus to be involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development

SRAD with its origins some 15 years ago by Michael Commons and his associates in Cambridge Massachusetts. Through the good will and support of this society we also became and are still heavily involved with the Journal of Adult Development and the Kluwer Plenum Monograph Series on Adult Development and Aging of which this volume is a companion. Many of the contributions in the volume are from SRAD members who consistently adhere to a focus on positive adult development. Their chapters have been complemented by pieces from other researchers who have adopted more mainstream approaches to adult development and aging. Regardless of the particular approach and or focus of the chapter all the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago. Thus the volume represents state of the art theory research and practice on adult development which has the potential to occupy us all for some time to come.

*Creating Contexts for Learning and Self-authorship* Marcia B. Baxter Magolda, 1999. This book is intended to help college faculty create conditions in which students learn to construct knowledge in their disciplines and achieve self authorship. A significant and often overlooked dimension mediating learning and self authorship centers on learners ways of knowing or their assumptions about the nature limits and certainty of knowledge. A learner who assumes that all knowledge is certain expects to hear answers from an authority figure in contrast a learner who views knowledge as relative expects to explore multiple viewpoints. By taking a constructive developmental approach the author demonstrates how students ability to construct knowledge is intertwined with the development of their assumptions about knowledge itself and their role in creating it. She shows how the structure of constructive developmental teaching hinges on three principles: validating students ability to know, situating learning in students experience and defining learning as teachers and students mutually constructing meaning. The book also takes abstract pedagogical principles and translates them into practical approaches.

*Informed Choice in Maternity Care* Mavis Kirkham, 2004-08-23. Informed choice in maternity care is government policy and is therefore an important issue in the education of midwives and obstetricians. This book brings together key research in the area and provides a forum for the concerns of all involved. Contributors are drawn from a wide range of perspectives including service users, lay support groups, midwives, social scientists, obstetricians, nursing and law. *Informed Choice in Maternity Care* is timely, topical and covers a number of current debates.

**The Gender and Psychology Reader** Blythe Clinchy, Julie K. Norem, 1998-04. Touches upon most of the significant and controversial underlying issues involved in the study of gender including methodological issues. The selections included range from research summaries on particular topics e.g. gender differences in emotion to work on development of gendered self concepts to discussion of psychology's ambivalence about the study of difference and its failure to systematically consider race, ethnicity and class. The concluding chapter considers unifying themes, gaps in current perspectives and future directions.
