Its advanced solid-state circuit and convenience features make it ideal for novices, short wave listeners and amateurs.

### Deluxe Matching Station Speaker

Styled to match the HR-1680, with response tailored to SSB. 4 ohms impedance for use with most other gear too. Includes cable and plug. Easy kit assembly.

Kit HS-1661

This is the famous Heathkit SW-717—a fine-performing Shortwave Radio and an ideal kit for a beginner.

See page 7.

The superhet double-conversion receiver features a double-tuned RF stage to provide maximum signal on each band. AGC controlled IF and RF stages permit signals of varying strengths to be received without fading or blasting. A four pole crystal filter provides excellent SSB reception and a two-stage active audio filter provides a very sharp bandpass for excellent CW operations. The use of solid-state components throughout eliminate heat buildup and drift, and contributes to the HR-1680's outstanding frequency stability.

Has a front panel "S" meter to indicate relative signal strength. AF and RF gain controls, and preselector. The extra-large, easy-tune spinner and easy-to-read dial calibrated in 500 kHz increments make "right on" station selection fast and easy. Even uses the same dial readout for all four bands—simply flip the bandswitch to change bands. Has mode and function selectors, front panel headphone jack for low-impedance headphones, diode bandswitching, built-in 100 kHz crystal calibrator. This mode switch selects LSB, USB and CW with fast or slow AGC automatically engaged.

Kit construction is easy, with most parts mounted on printed circuit boards, an open chassis layout, and a wiring harness to simplify assembly. The HR-1680 can be aligned completely without external equipment. Its handsome "101 series" styling and clean functional look makes it ideal for use with Heathkit transmitters and many others. Its built-in AC power supply makes it useful in any base station operation.
