## **Green Chemistry for Surface Coatings, Inks and Adhesives** Rainer Höfer, Avtar Singh Matharu, Zhanrong

Zhang, 2019-06-06 Many modern surface coatings and adhesives are derived from fossil feedstocks. With fossil fuels becoming more polluting and expensive to extract as supplies dwindle, industry is turning increasingly to nature-mimicking natural solutions using renewable raw materials and employing new technologies. Highlighting sustainable technologies and applications of renewable raw materials within the framework of green and sustainable chemistry, circular economy, and resource efficiency, this book provides a cradle-to-cradle perspective. From potential feedstocks to recycling, reuse opportunities, and the de-manufacture of adhesives and solvents, green chemistry principles are applied to all aspects of surface coating, printing adhesive, and sealant manufacture. This book is ideal for students, researchers, and industrialists working in green sustainable chemistry, industrial coatings, adhesives, inks, and printing technologies. **Small Printer**, 1989

This text is a unique original contribution and represents a significant alternative to the collection of chapters written by others. The second edition has new cases with a few classics from the first edition that have been retained in response to reader feedback. The key subjects that are included have been significantly updated and treated in greater depth. The number of chapters has been reduced from 12 to 10 so it is easy to adapt to almost any course or training on the subject in any discipline or to any audience. This exceptionally informative book provides a broad perspective on how technological change can be effectively managed in modern organizations. The text explains the conceptual frameworks supported by new and original case studies for start-up companies like Askmen.com, the complex challenges of managing international technology-based companies like NexPress, a joint venture of Kodak and Heidelberg in the digital printing industry, and corporate sustainability using innovative new product technologies illustrated by the case of Evinrude's launch of the E-tec outboard motor. John E. Ettlie's three decades in the field of innovation as an instructor and researcher bring an exceptional perspective to this subject. His text is unique in its discussion of how technology has transformed the service sector. Few books on technology make the distinction between new offerings in manufacturing and the service sector, which is emphasized in this text. Bibliography of Scientific and Industrial Reports, 1946
