Moss, Susan M. Brookhart, 2012-07-02 In *Learning Targets* Connie M Moss and Susan M Brookhart contend that improving student learning and achievement happens in the immediacy of an individual lesson what they call today's lesson or it doesn't happen at all The key to making today's lesson meaningful Learning targets Written from student's point of view a learning target describes a lesson sized chunk of information and skills that students will come to know deeply Each lesson's learning target connects to the next lesson's target enabling students to master a coherent series of challenges that ultimately lead to important curricular standards Drawing from the authors extensive research and professional learning partnerships with classrooms schools and school districts this practical book Situates learning targets in a theory of action that students teachers principals and central office administrators can use to unify their efforts to raise student achievement and create a culture of evidence based results oriented practice Provides strategies for designing learning targets that promote higher order thinking and foster student goal setting self assessment and self regulation Explains how to design a strong performance of understanding an activity that produces evidence of student's progress toward the learning target

Wurdinger, 2016-07-18 Project based learning is a teaching approach that motivates and inspires students to learn and helps them to become self directed learners over time Students learn not only the content surrounding their projects but also important life skills such as problem solving creativity collaboration communication time management and responsibility Author Scott Wurdinger has implemented this approach over the past ten years in his own classrooms has conducted numerous research studies on this topic and has seen the effectiveness of project based learning firsthand This book provides information on the history research and application of the project based learning approach and should be read by educators who want to change their classrooms into dynamic exciting learning environments Educators will learn everything they need to know about how to implement this approach in their classrooms as well as how to help students create meaningful relevant projects that can help impact and solve school community and even global problems Read this book and bring project based learning to your classroom *Helping Students Learn in a Learner-Centered Environment* Terry Doyle, 2023-07-03 Before entering higher education most students learning experiences have been traditional and teacher centered Their teachers have typically controlled their learning with students having had little say about what and how to learn For many students encountering a learner centered environment will be new possibly unsettling and may even engender resistance and hostility Taking as his starting point students attitudes toward and unfamiliarity with learner centered classrooms Terry Doyle explains that motivating students to engage with this practice first of all requires explaining its underlying rationale and then providing guidance on how to learn in this environment This book is about how to help students acquire the new skills and knowledge they need to take on unfamiliar roles and responsibilities It is informed by the author s extensive experience in managing learner centered classes and by his consultation work with faculty The first four chapters focus on the importance of imparting to students the evidence and underlying philosophy that is driving higher education to move from a teacher centered to a learner centered practice and what this means for students in terms of having control over and making important choices about their learning The final eight chapters focus on how to impart the skills that students need to learn or hone if they are to be effective learners in an environment that is new to them The book covers such practices as learning on one s own creating meaningful learning when collaborating with others peer teaching making presentations developing life long learning skills self and peer evaluation and give meaningful feedback This book provides a rich and informative answer to the fundamental question how do I help my students adjust to a learner centered

practice **Helping Students Take Control of Their Own Learning** Don Mesibov, Dan Drmacich, 2022-06-16 What does learner centered education look like and how can we best put it into practice This helpful book by experienced educators Don Mesibov and Dan Drmacich answers those questions and provides a wide variety of strategies activities and examples to help you with implementation Chapters address topics such as positioning students at the center of the lesson and teachers as coaches making tasks relevant and engaging incorporating the affective domain and social emotional learning assessing learning and more Appropriate for new and experienced teachers of all grades and subjects this book will leave you feeling ready to help students take control of their own learning so they can reach higher levels of success Teaching for Learning Claire Howell Major, Michael S.
