Hemispheric Giants Britta H. Crandall, 2011-01-16 Tracing the full arc of U S Brazilian interaction Hemispheric Giants thoroughly explores the enigmatic and often misunderstood nature of the relationship between the two largest countries in the Western Hemisphere Britta H Crandall asks the crucial question of why significant engagement between the United States and Brazil has been so scarce since the inception of the bilateral relationship in the late 1800s Especially she critically examines Washington's so called benign neglect a policy often criticized as unbefitting Brazil's size and strategic importance Drawing on a rich array of archival sources and personal interviews Crandall pinpoints the key examples through time of high level U S policy attention to Brazil Her comprehensive analysis of the ebbs and flows of policy engagement allows Crandall to tease out common threads among her cases In so doing she shows that the label neglect implying a one sided fitful relationship is far from the reality of a mutual ongoing policy engagement between the U S and Brazilian governments To be sure their different relative power positions and foreign policy traditions have limited high level bilateral engagement However Crandall argues convincingly that the diminishing power disparity between the United States and Brazil is leading to closer ties in the twenty first century a trend that will bring about growing cooperation as well as competition in the future

astrophysical plasmas therefore understanding the basic physical processes associated with magnetodiscs has universal applications The second chapter characterizes the solar wind interaction and auroral responses to solar wind driven dynamics The third chapter describes the role of magnetic reconnection and the effects on plasma transport Finally the last chapter characterizes the spectral and spatial properties of auroral emissions distinguishing between solar wind drivers and internal driving mechanisms The in depth reviews provide an excellent reference for future research in this discipline

Friedjung,Scott J. Kenyon,Roberto Viotti,2012-12-06 Symbiotic stars were identified spectroscopically as M giants with a very strong He II 4686 emission line After five decades of study by many astronomers the first international meetings devoted to symbiotics were held at the University of Colorado Boulder and at the Haute Provence Observatory during the Summer of 1981 These conferences emphasized exciting new results obtained by modern satellite EINSTEIN IUE and ground based observatories Although the vast majority of the participants were already fairly sure that symbiotics are almost certainly interacting binary systems and not extremely peculiar single stars it was not clear exactly which types of physical processes were needed to be invoked to explain their observed behaviour Many were even worried that it might not be possible to clearly define a class of symbiotic stars and thus establish a unique model applicable to any system Since the publication of the Haute Provence proceedings our understanding of the physical processes occurring in symbiotic stars and in related objects such as cataclysmic variables and compact planetary nebulae has greatly improved We now speak confidently of a symbiotic phenomenon in which an evolved red giant and a hot companion object usually thought to be an accreting main sequence star or a luminous white dwarf star happily coexist Waking the Giant Bill McGuire,2013-04-25 The last 20 000 years has seen our world flip from icehouse to greenhouse provoking earthquakes tsunamis and volcanic outbursts Like a giant stirring from a long sleep the Earth beneath our feet tossed and turned Bill McGuire argues that climate change is once more setting the scene for the giant to reawaken and we can already see the signs **Extreme Science: Chasing the Ghost Bat** Peter Jedicke,2001-11-17 A collection of articles drawn from the pages of Scientific American magazine that provide information about some of the mysteries and wonders of biology and zoology **Awaken The Creative Giant Within** Dr. Gurudas Bandyopadhyay,2024-07-17 10x your life and serve society Improve your creative spirit Think more creatively generate exceptional ideas and stand apart from the crowd Think everyone can be creative Know the secret tools
