Non-biomedical Perspectives on Pain and its Prevention and Management Mark I. Johnson, James Woodall, Emmanouil Georgiadis, Antonio Bonacaro, Isobel Jacob, 2024-06-06. Overreliance on the biomedical paradigm has contributed in part to illogical use of surgery and long-term opioid medication with harmful physical, psychological, social and economic consequences. Pain literature is dominated by biomedical research at the expense of a holistic understanding of the lived experience of pain. Pain practice seems overly consumed with the burden of pain at an individual level, patient-centred pain management and has neglected exploration of societal level, community-centred or environmental level, ecologically-centred solutions.

Coordonné par deux chirurgiens et un rhumatologue cet ouvrage insiste sur cette approche pluridisciplinaire pour une meilleure prise en charge du patient. Trente auteurs ont participé à un sommaire très riche. Un rappel des données connues et une mise à jour des différents aspects de cette pathologie sont proposés : la physiopathologie, la clinique, l'imagerie, le traitement médical rhumatologique et de médecine physique. Sont également décrites toutes les associations possibles de la hernie discale avec les autres pathologies du rachis lombaire : canal étroit, spondylolisthésis, scoliose ainsi que des situations difficiles à prendre en charge comme la hernie discale paralysante, la récurrence de hernie discale ou la hernie lombaire discale du jeune. Les techniques chirurgicales classiques et mini-invasives adaptées à la réduction rapide sont développées. Les indications de libération d'arthrodèse voire de prothèse discale sont discutées. Enfin l'impact socioprofessionnel est abordé ainsi que des prises en charge plus originales comme l'ostéopathie. Rédigé de façon pratique et didactique cet ouvrage intéressera un public large de praticiens prenant en charge cette pathologie : rhumatologues, éducateurs, médecins du travail et chirurgiens.
