See, 2025-02-18 This book takes a full 360 macro to micro approach to understanding the problems presented by opioids The macro approach examines the international role played by other countries in the production of foreign made fentanyl currently flooding the streets of the United States This approach continues when looking at the responses of various state and local governments but takes a micro approach when looking at the effects on individuals such as athletes students and patients in pain This full spectrum approach allows the reader to gain an understanding of the opioid epidemic in a way that has never been presented in other sources Opioids 360 addresses and explains critical issues

by having experts from various fields come together to focus their attention and knowledge on this problem affecting our nation. The chapters in *Opioids 360* are written by experts in the fields of criminology, medicine, economics, psychology, sociology, communication, religion, and ethics. It also includes sections of students talking to students. In the *Beyond Opioids* chapter, five Methodist University undergraduate students talk directly to students across the country about medication issues involving PTSD, Anxiety, Depression, ADHD, and Drug seeking behavior. Practical policy recommendations are offered throughout the book. They are designed to educate as well as to help improve and save lives. Guns 360 Christopher M. Bellas, Eric S. See, Sarah A. See, 2022-06-22. *Guns 360* takes a comprehensive and common sense approach to some of the most difficult issues facing not only the criminal justice system but also society as a whole: firearm possession, regulation, and control. Issues related to firearms cut across all dimensions of society and are a concern to everyone from the members of the general public to law enforcement, academics, politicians, public health agencies, and the media. An interdisciplinary approach is needed to fully understand and appreciate the many facets related to firearms. Firearm related issues cover more than mere ownership and possession. School shootings and mass shootings dominate the headlines and cause fear for both parents and students. Firearm regulation and licensing divide politicians and create solid one issue voting blocks. Firearms used in domestic violence incidents and weapons owned and used by the mentally ill generate more victims than solutions. The marketing, messaging, and purchasing of firearms are all shaped by a variety of criminological, sociological, and psychological forces used to influence commercial behavior. This book combines academics in the fields of criminology, psychology, sociology, philosophy, economics, communications with practical experts with law enforcement, military management, forensics, public health, medicine, and digital forensics backgrounds. This multidisciplinary approach has been brought together to further our understanding of firearms and their impacts on our society from every angle. Firearms will never disappear nor will the controversy surrounding them suddenly turn into agreement. What can be accomplished, however, is an increased knowledge, understanding, and discussion of the complex topics involved within these debates.
