

Study Guide: Adjusting Entries

I. Definition:

Adjusting entries are journal transactions at the end of an accounting period that adjust those revenues and expenses as recognized in the current period, aligning with the accounting cycle.

II. Types of Adjusting Entries:

- **Accruals:** Recognize revenues/expenses before cash is received/paid
 - **Accrued Revenues:** Revenues earned but not yet received
 - **Accrued Expenses:** Expenses incurred but not yet paid
- **Deferrals:** Recognize revenues or expenses after cash is received/paid
 - **Prepaid Expenses:** Expenses paid but not yet used up
 - **Unearned Revenues:** Revenues received but not yet earned

III. Purpose:

- **Match revenues with expenses:** Adjusting entries ensure that revenues and expenses are recorded when earned and incurred, not necessarily when cash is received or paid.
- **Update account balances:** Adjusting entries update account balances for better accuracy throughout the reporting financial statements.

IV. Examples of Adjusting Entries:

- **Accrued interest revenue:** The services provided but not yet billed.
- **Accrued interest expense:** The interest used but not yet paid.
- **Unearned prepaid expenses:** An advance that was not the service provided.
- **Adjusting unearned revenues:** An unearned revenue as it is earned.

V. Process of Making Adjusting Entries:

- **Identify accounts affected:** Determine which accounts need adjustment (revenues, expenses, assets, liabilities).
- **Determine the adjustment amount:** Calculate the adjustment amount for each account based on available information.
- **Record the journal entry:** Create the appropriate journal entry for the adjustment.
- **Post the entry to the ledger:** Update the general ledger with the adjusting entries.
- **Prepare financial statements:** Adjusted account balances are used to prepare accurate financial statements.
