Causal Pluralism in the Life Sciences Kolja Ehrenstein,2022-03-28 This book takes a new approach to the debate on causal pluralism in the philosophy of biology by asking how useful pluralism is instead of debating its truth The core thesis in this work is that many problems do not hinge on the question of whether or not we subscribe to causal pluralism As one step in this central argument the author develops an account that reasonably distinguishes pluralism from monism in another step he studies cases that allegedly motivate causal pluralism in biology Examining these cases shows how pluralism is often irrelevant and why pursuing pluralism is sometimes dangerous since it may generate pseudo solutions to persistent philosophical problems This book offers a systematic approach to this subject matter and argues that we might have overestimated the significance of the monism pluralism distinction and at the same time failed to see the risks of pursuing causal pluralism **Precautionary Reasoning in Environmental and Public Health Policy** David B. Resnik,2021-03-27

This book fills a gap in the literature on the Precautionary Principle by placing the principle within the wider context of precautionary reasoning and uses philosophical arguments and case studies to demonstrate when it does and does not apply The book invites the reader to take a step back from the controversy surrounding the Precautionary Principle and consider the overarching rationales for responding to threats to the environment or public health It provides practical guidance and probing insight for the intended audience including scholars students journalists and policymakers **Formal Ontology in**

Information Systems P. Garbacz,O. Kutz,2014-09-05 Formal Ontology in Information Systems FOIS is the flagship

conference of the International Association for Ontology and its Applications IAOA Its interdisciplinary research focus lies at the intersection of philosophical ontology linguistics logic cognitive science and computer science as well as in the applications of ontological analysis to conceptual modeling knowledge engineering knowledge management information systems development library and information science scientific research and semantic technologies in general As in previous years FOIS 2014 was a nexus of interdisciplinary research and communication The current proceedings is divided into four main sections dealing with foundations processes agency and dispositions methods and tools and applications The last of these covers a broad spectrum of areas including in particular biology and medicine engineering and economy For the first time in its history the conference hosted a special track an ontology competition the aim of which was to encourage authors to make their ontologies publicly available and to allow them to be evaluated according to a set of predetermined criteria Papers discussing these ontologies can also be found in this volume The book will be of interest to all those whose work involves the application of ontologies and who are looking for a current overview of developments in formal ontology
