Heidelberg Tok 1 Manual:

PASCAL User Manual and Report Kathleen Jensen, Niklaus Wirth, 2013-06-29 A preliminary version of the programming language Pascal was drafted in 1968. It followed in its spirit the Algol 60 and Algol W line of languages. After an extensive development phase a first compiler became operational in 1970 and publication followed a year later see References 1 and 8 p. 1m4. The growing interest in the development of compilers for other computers called for a consolidation of Pascal and two years of experience in the use of the language dictated a few revisions. This led in 1973 to the publication of a Revised Report and a definition of a language representation in terms of the ISO character set. This booklet consists of two parts: The User Manual and the Revised Report. The Manual is directed to those who have previously acquired some familiarity with computer programming and who wish to get acquainted with the language Pascal. Hence the style of the Manual is that of a tutorial and many examples are included to demonstrate the various features of Pascal. Summarising tables and syntax specifications are added as Appendices. The Report is included in this booklet to serve as a concise ultimate reference for both programmers and implementors. It defines standard Pascal which constitutes a common base between various implementations of the language.

Computer Aided Verification E. Allen Emerson, A. Prasad Sistla, 2006-12-30 This volume contains the proceedings of the 12th International Conference on Computer Aided Verification CAV 2000 held in Chicago Illinois USA during 15-19 July 2000. The CAV conferences are devoted to the advancement of the theory and practice of formal methods for hardware and software verification. The conference covers the spectrum from theoretical foundations to concrete applications with an emphasis on verification algorithms, methods and tools together with techniques for their implementation. The conference has traditionally drawn contributions from both researchers and practitioners in academia and industry. This year 91 regular research papers were submitted out of which 35 were accepted while 14 brief tool papers were submitted out of which 9 were accepted for presentation. CAV included two invited talks and a panel discussion. CAV also included a tutorial day with two invited tutorials. Many industrial companies have shown a serious interest in CAV ranging from using the presented technologies in their business to developing and marketing their own formal verification tools. We are very proud of the support we receive from industry. CAV 2000 was sponsored by a number of generous and forward looking companies and organizations including Cadence Design Systems, IBM Research, Intel, Lucent Technologies, Mentor Graphics, the Minerva Center for Verification of Reactive Systems, Siemens and Synopsys.

The CAV conference was founded by its Steering Committee: Edmund Clarke (CMU), Bob Kurshan (Bell Labs), Amir Pnueli (Weizmann) and Joseph Sifakis (Verimag).

Conceptual Modeling -- ER 2003 Il-Yeol Song, Stephen W. Liddle, Tok Wang Ling, Peter Scheuermann, 2003-10-24 The 22nd International Conference on Conceptual Modeling ER 2003 returned to Chicago after an absence of 18 years Chicago a city well known for its trendsetting and daring

architecture has met the new century with a renewed commitment to open public spaces and human interaction. Thus it provided a fitting venue for ER 2003 the scope of which was expanded to encompass all aspects of conceptual modeling in order to deal with constantly changing information technology and business practices and to accommodate a new openness in connecting systems to each other and to human users. The ER 2003 Program Co chairs Il Yeol Song, Stephen Liddle and Tok Wang Ling along with an outstanding Program Committee assembled one of the best technical programs of this conference series. In keeping with the tradition of previous ER conferences the program for ER 2003 also included four preconference workshops, two preconference tutorials, two conference tutorials, two panels and a demos and poster session. The Program Co chairs as well as Manfred Jeusfeld and Oscar Pastor Workshop Co chairs Ee Peng Lim and Tobey Teorey Tutorial Co chairs Avigdor Gal and Elisa Bertino Panel Co chairs and Heinrich Mayr Demos and Poster Chair deserve our appreciation for an excellent job. It was a pleasure working with all of them.

Web and Communication Technologies

and Internet-Related Social Issues - HSI 2005 Shinji Shimojo, Shingo Ichii, Tok Wang Ling, Kwan-Ho Song, 2005-08-25 The Internet has now become an integral part of everyday life for hundreds of millions of people around the world. The uses of the Internet have augmented commerce, communication, education, governance, entertainment, health care, etc. E-mail has become an indispensable part of life, the Web has become an indispensable source of information on just about everything, people now use government Websites to receive instructions and information and to do paperwork with the government, many major online businesses have been created such as Amazon, eBay, Google, Travelocity, eTrade, etc. However, the uses of the Internet have also had serious negative effects including spam, the spreading of viruses and worms, spyware, phishing, hacking, online fraud, invasions of privacy, etc. Viruses and worms often bring down tens of millions of computers around the world, many people get duped into furnishing their personal identifications and bank and insurance account information, etc. Hackers break into government and corporation computers to steal critical data, unsubstantiated rumors about individuals or organizations spread like wildfire on the Internet, etc. Further, the uses of the Internet are creating new paradigms in areas such as copyright, governance, etc. The widespread use of peer-to-peer file sharing systems started by Napster is forcing a reassessment of the value of holding copyright on digital media. Internet postings by vocal citizens to the Web sites of the news media, government offices and elected government officials are impacting government policies and swaying the opinions of other citizens.
