Hell And High Water The Global Warming Solution:

Hell and High Water Joseph J. Romm, 2007 **Hell and High Water** Joe Romm, 2007 Romm presents a scathing critique of the current environmental and energy policy with a passionate and practical call to action on global warming now before it's too late **Hell and High Water** Joe Romm, 2008-01-08 Global warming is the story of the twenty first century It is the most serious issue facing the future of humankind but American energy and environmental policy is driving the whole world down a path toward global catastrophe According to Joseph Romm we have ten years at most to start making sharp cuts to our greenhouse gas emissions or we will face disastrous consequences The good news he writes is that there is something we can do but only if the leadership of the U S government acts immediately and asserts its influence on the rest of the world Hell and High Water is nothing less than a wake up call to the country It is a searing critique of American environmental and energy policy and a passionate call to action by a writer with a unique command of the science and politics of climate change **Storm Warning** Robert William Sandford, 2015 Human beings and industrial based society are changing the composition of our planet's atmosphere and causing it to warm at an unnatural and oftentimes astonishing rate Much of that warmth is being absorbed by water which is causing an acceleration in the rate and manner in which water moves through the global hydrological cycle A warmer atmosphere carries more water vapor which means as temperatures continue to rise storms will be more intense last longer and cause more damage to our towns cities and vital infrastructure On the other side of the hydro climate coin we can also expect deeper more persistent and damaging droughts throughout the world resulting in dramatic losses difficult economic outcomes and fundamental alterations to landscape This highly considered accessible and readable book explains how changes in the water cycle have already begun to affect how we think about and value water security and climate stability and what we can do to ensure a sustainable future for our children and grandchildren **Getting Green Done (EasyRead Large Bold Edition)** Auden Schendler, 2010 Auden Schendler serves as the sustainability director of the Aspen Skiing Company which operates the Aspen Snowmass resort complex in Colorado He discusses his successes and failures in promoting sustainability to illustrate the lessons he has learned Proving refreshingly open Schendler criticizes his colleagues including his previous CEO who told Schendler he could introduce a green initiative only over my dead body Schendler calls for transparency and an end to greenwashing demanding that corporations nonprofit organizations and governmental bodies clarify which sustainability projects work and which do not and pursue the ones that make a difference getAbstract recommends this valuable guide to executives government leaders and concerned citizens who want to take meaningful action against global warming *Ecology and Socialism* Chris Williams, 2010-08-17 Around the world consciousness of the threat to our environment is growing The majority of solutions on offer from using efficient light bulbs to biking to work focus on individual lifestyle changes yet the scale of the crisis requires far deeper adjustments Ecology and Socialism argues that time still remains to save humanity and the planet but only by

building social movements for environmental justice that can demand qualitative changes in our economy workplaces and infrastructure Chris Williams is a longtime environmental activist professor of physics and chemistry at Pace University and chair of the science department at Packer Collegiate Institute He lives in New York City *Structuring an Energy Technology Revolution* Charles Weiss, William B. Bonvillian, 2012-01-13 An argument for a major federal program to stimulate innovation in energy technology and a proposal for a policy approach to implement it America is addicted to fossil fuels and the environmental and geopolitical costs are mounting A public private program at an expanded scale to stimulate innovation in energy policy seems essential In *Structuring an Energy Technology Revolution* Charles Weiss and William Bonvillian make the case for just such a program Their proposal backs measures to stimulate private investment in new technology within a revamped energy innovation system It would encourage a broad range of innovations that would give policymakers a variety of technological options over the long implementation period and at the huge scale required faster than could be accomplished by market forces alone Even if the nation can't make progress at this time on pricing carbon a technology strategy remains critical and can go ahead now Strong leadership and public support will be needed to resist the pressure of entrenched interests against putting new technology pathways into practice in the complex and established energy sector This book has helped start the process **The Benefits and Challenges of Producing Liquid Fuel from Coal** United States. Congress. House. Committee on Science and Technology (2007). Subcommittee on Energy and Environment, 2008

We are the Weather Makers Tim Flannery, Sally M. Walker, 2009 Based on the author's best seller *The Weather Makers* this accessible new edition speaks directly to young adults offering a clear look at the history of climate change how it will unfold over the next century and what we can do to prevent a cataclysmic future **Green Planet** Stanley A. Rice, 2009-01-28 Plants are not just a pretty part of the landscape they keep the entire planet with all of its human and nonhuman inhabitants alive Stanley Rice documents the many ways in which plants do this by making oxygen regulating the greenhouse effect controlling floods and producing all the food in the world Plants also create natural habitats for all organisms in the world With illustrations and clear writing for non specialists *Green Planet* helps general readers realize that if we are to rescue the Earth from environmental disaster we must protect wild plants Beginning with an overview of how human civilization has altered the face of the Earth particularly by the destruction of forests the book details the startling consequences of these actions Rice provides compelling reasons for government officials economic leaders and the public to support efforts to save threatened and endangered plants Global campaigns to solve environmental problems with plants such as the development of green roofs and the Green Belt Movement a women's organization in Kenya that empowers communities worldwide to protect the environment show readers that efforts to save wild plants can be successful and beneficial to the economic well being of nations Through current scientific evidence readers see that plants are vital to the ecological health of our planet and understand what can be done to lead to a better and greener future Benefits of plants

Help modulate greenhouse gases Produce almost all oxygen in the air Create cool shade that reduces energy costs Prevent floods droughts and soil erosion Produce all of the food in the world Create and preserve soil Create natural habitats Heal the landscape after natural and human disasters Crisis of Global Sustainability Tapio Kanninen, 2013 This concise and informative text provides a critical history of the concept of sustainability and the various institutional measures taken to promote implement and enforce sustainable development proposing new organizational solutions to deal with the crisis of sustainability Crisis of Global Sustainability provides for the first time a compact insider description of the evolution and impact of the Club of Rome a global think tank that produced a groundbreaking 1972 study The Limits to Growth which highlighted the dangers of unrestrained economic growth and possible collapse of global economy during the first decades of the 21st century With recent research confirming the validity of these concerns Kanninen asks whether our overarching concept of thinking on world development today should continue to be global sustainability which implies that we still have enough time to make adjustments in our future policies and action Or should the main paradigm of our thinking shift to global survivability a concept that stresses the absolute necessity of immediate and drastic change both in institutions and policies Many environmentalists green politicians and think tanks are speaking today more loudly than ever about the necessity for a major policy institutional and paradigm change and this work is essential reading for students and scholars alike *Templeton Science and Religion Book Series Bundle* J. Wetzel van Huyssteen, Khalil Chamcham, 2013-08-01 In the Templeton Science and Religion Series scientists from a wide range of fields distill their experience and knowledge into brief tours of their respective specialties The series was launched in 2008 with the publication of Harold G Koenig s book Medicine Religion and Health Since that time the series editors J Wentzel van Huyssteen and Khalil Chamcham have expanded it to nine titles covering everything from paleontology to neuroscience to technology Also found in the bundle is the TSR Reader and a companion study guide The books found in the bundle are Medicine Religion and Health by Harold G Koenig Neuroscience Psychology and Religion by Malcolm Jeeves and Warren Brown Technology and Religion by Noreen Herzfeld Horizons of Cosmology by Joseph Silk Paleontology by Ian Tttersall Cognitive Science Religion and Theology by Justin L Barrett Ecology and the Environment by R J Berry The Language of Genetics by Denis Alexander Mathematics and Religion by Javier Leach The Templeton Science and Religion Reader The Templeton Science and Religion Study Guide This bundle is only sold in e book format *Persuasive Aesthetic Ecocritical Praxis* Patrick D. Murphy, 2015-08-20 Persuasive Aesthetic Ecocritical Praxis continues Patrick D Murphy s focus on transversal ecocritical praxis by considering literature and cinema in terms of the persuasive force of aesthetic activity and whether or not artistic production and its criticism can be considered forms of activism Murphy argues that literature and other forms of aesthetic production hold out the promise of being able to move some individuals deeply through both affective and intellectual engagement in ways that facilitate ideological reflection To analyze aesthetic production ecocritically requires a transversal orientation in order to work

continuously at accommodating a vast array of often seemingly disparate perspectives disciplines and contextual information as well as the ever changing thematic plot setting and contextual elements of the aesthetic works under consideration and the responses of changing audiences through time and across cultures Murphy demonstrates this approach through presenting theories of transversality and applying them with attention to issues of propaganda agitation and persuasion both in terms of artistic production and the criticism of such production He also brings an ecofeminist orientation to the fore with particular attention to the gendered economic aspects of environmental issues in an age of land grabs and plantation economies Along the way he treats a wide range of literary works films and miniseries In American literature he discusses realist and science fiction works from Susan Fenimore Cooper s Rural Hours to Paolo Bacigalupi s The Windup Girl Barbara Kingsolver s Flight Behavior to Kim Stanley Robinson s 2312 and Ana Castillo s So Far from God to Leslie Marmon Silko s Gardens in the Dunes In international literature he analyzes Mo Yan s The Garlic Ballads Jiang Rong s Wolf Totem Michiko Ishimure s The Lake of Heaven Miyuki Miyabe s All She Was Worth and other novels The book concludes with a reading of Ernest Callenbach s Ecotopia and Ecotopia Emerging an Afterword recommending further directions for transversal ecocritical research an and interview that discusses Murphy s previous book Transversal Ecocritical Praxis and provides some personal background on the author

Down to the Wire David W. Orr, 2009-09-17 The real fault line in American politics is not between liberals and conservatives It is rather in how we orient ourselves to the generations to come who will bear the consequences for better and for worse of our actions So writes David Orr in Down to the Wire a sober and eloquent assessment of climate destabilization and an urgent call to action Orr describes how political negligence an economy based on the insatiable consumption of trivial goods and a disdain for the well being of future generations have brought us to the tipping point that biologist Edward O Wilson calls the bottleneck Due to our refusal to live within natural limits we now face a long emergency of rising temperatures rising sea levels and a host of other related problems that will increasingly undermine human civilization Climate destabilization to which we are already committed will change everything and to those betting on quick technological fixes or minor adjustments to the way we live now Down to the Wire is a major wake up call But this is not a doomsday book Orr offers a wide range of pragmatic far reaching proposals some of which have already been adopted by the Obama administration for how we might reconnect public policy with rigorous science bring our economy into alignment with ecological realities and begin to regard ourselves as planetary trustees for future generations He offers inspiring real life examples of people already responding to the major threat to our future An exacting analysis of where we are in terms of climate change how we got here and what we must now do Down to the Wire is essential reading for those wanting to join in the Great Work of our generation

The Inquisition of Climate Science James Lawrence Powell, 2011-08-30 Modern science is under the greatest and most successful attack in recent history An industry of denial abetted by news media and infotainment broadcasters more interested in selling controversy than presenting facts has

duped half the American public into rejecting the facts of climate science an overwhelming body of rigorously vetted scientific evidence showing that human caused carbon based emissions are linked to warming the Earth The industry of climate science denial is succeeding public acceptance has declined even as the scientific evidence for global warming has increased It is vital that the public understand how anti science ideologues pseudo scientists and non scientists have bamboozled them We cannot afford to get global warming wrong yet we are thanks to deniers and their methods The Inquisition of Climate Science is the first book to comprehensively take on the climate science denial movement and the deniers themselves exposing their lack of credentials their extensive industry funding and their failure to provide any alternative theory to explain the observed evidence of warming In this book readers meet the most prominent deniers while dissecting their credentials arguments and lack of objectivity James Lawrence Powell shows that the deniers use a wide variety of deceptive rhetorical techniques many stretching back to ancient Greece Carefully researched fully referenced and compellingly written his book clearly reveals that the evidence of global warming is real and that an industry of denial has deceived the American public putting them and their grandchildren at risk *Green Culture* Kevin Wehr,2011-05-03 *Green Culture* An A to Z Guide explores the on going paradigm shift in culture and lifestyles toward promoting a sustainable environment After years of discussion about the environment dating back to the 1960s counter culture the recent explosion of green initiatives has induced the general public to embrace all things green from recycling in the home to admiring green celebrities This volume assesses the green cultural transformations by presenting some 150 articles of importance to students of sociology history political science communications public relations anthropology literature arts and drama Presented in A to Z format the articles include appealing topics from green Hollywood to green spirituality green art and green restaurants This work culminates in an outstanding reference available in both print and electronic formats for academic university and public libraries Vivid photographs searchable hyperlinks numerous cross references an extensive resource guide and a clear accessible writing style make the *Green Society* volumes ideal for classroom use as well as for research *Energy and American Society - Thirteen Myths* Benjamin K. Sovacool,Marilyn A. Brown,2007-05-04 Current events related to energy policy skyrocketing gasoline prices the 2003 Northeast Blackout the Kyoto Protocol s enactment passage of the Energy Policy Act of 2005 and the influence of recent Gulf Coast hurricanes on energy supplies and prices demand innovative approaches towards conceptualizing the relationship between energy and American society This book takes on a central quandary in the study of energy and environmental policy What myths continue to exist in American culture concerning energy the environment and society It enrolls twenty four of the nation s top experts working on energy policy in industry government laboratories utilities nonprofit organizations and universities to debunk and contextualize thirteen energy myths relating to electric power renewable energy energy efficiency transportation and climate change While the book focuses on the American experience it will be of interest to those working in the fields of energy policy energy and

the environment and technology assessment worldwide This is a brilliant bold and fascinating book that should be read by anybody even remotely concerned about energy the environment or the future of American society Art Rosenfeld Commissioner California Energy Commission and recipient of the 2006 Enrico Fermi Award This work is a must read for anyone interested in American energypolicy Kateri Callahan President Alliance to Save Energy By collecting the best minds to debunk the greatest of these myths Sovacool and Brown have brought us a step closer to finding a national energy policy based on common sense Chris Cooper Executive Director Network for New Energy Choices Sovacool and Brown provide a bold and imaginative way forward John A Skip Laitner Visiting Fellow and Senior Economist American Council for an Energy Efficient Economy

Getting Green Done Auden Schendler,2009 In this witty and contrarian book Schendler a sustainable business foot soldier with 15 year s worth of experience gives a peek under the hood of the green movement He illuminates the path toward sustainability

Institutions and Governance in Comparative Policy Analysis Studies Iris Geva-May,B. Guy Peters,Joselyn Muhleisen,2020-06-09 Volume Two of the Classics of Comparative Policy Analysis contains chapters concerned with Institutions and Governance in Comparative Policy Analysis Studies They highlight that at the core of any policy making the different institutions and modes of governance have a significant effect Questions about the impact of governance have become more central to comparative policy analysis as scholars have given more attention to globalization organizational cultural differences policy learning transfer and diffusion The chapters included in this volume tackle the nature of policies and policy analytic practices within and across organizations actors and institutions as well as among governance modes The chapters demonstrate the ways in which institutions and governance in the public and private sectors shape policies and conversely how policy choices can shape the institutions associated with them Other chapters focus on how the diffusion of knowledge and lesson drawing address challenges of policy making cooperation and harmonization Institutions and Governance in Comparative Policy Analysis Studies will be of great interest to scholars and learners of public policy and social sciences as well as to practitioners considering what can be reliably contextualized learned facilitated or avoided given their own institutional or governance systems The chapters were originally published as articles in the Journal of Comparative Policy Analysis which in the last two decades has pioneered the development of comparative public policy The volume is part of a four volume series the Classics of Comparative Policy Analysis including Theories and Methods Institutions and Governance Regional Comparisons and Policy Sectors Each volume also showcases a new chapter comparing interrelated domains of study with comparative public policy political science public administration governance and policy design authored by JCPA co editors Giliberto Capano Iris Geva May Michael Howlett Leslie Pal and B Guy Peters

Cultures of Energy Sarah Strauss,Stephanie Rupp,Thomas Love,2016-06-16 This path breaking volume explores cultures of energy the underlying but under appreciated dimensions of both crisis and innovation in resource use around the globe Theoretical chapters situate pressing energy issues in larger conceptual frames and ethnographic case

studies reveal energy as it is imagined used and contested in a variety of cultural contexts Contributors address issues including the connection between resource flows and social relationships in energy systems cultural transformation and notions of progress and collapse the blurring of technology and magic social tensions that accompany energy contraction and sociocultural changes required in affluent societies to reduce dependence on fossil fuels Each of five thematic sections concludes with an integrative and provocative conversation among the authors The volume is an ideal tool for teaching unique contemporary and comparative perspectives on social theories of science and technology in undergraduate and graduate courses
