Yearning for a change Steven Nightingale took his family to live in the ancient Andaluc an city of Granada But as he journeyed through its hidden courtyards scented gardens and sun warmed plazas Steven discovered that Granada s present cannot be separated from its past and began an eight year quest to discover more Where once Christians Muslims and Jews lived peacefully together and the arts and sciences flourished Granada also witnessed brutality places of worship razed to the ground books burned massacre and anarchy In the 1600s the once populous city was reduced to 6 000 who lived among rubble In the next three centuries the deterioration worsened and the city became a refuge for anarchists then during the Spanish Civil War fascism took hold Literary and sensual Steven Nightingale produces a portrait of a now thriving city and the joy he discovered there revealing the resilience and kindness of its people the resonance of its gardens and architecture the wonders of the Alhambra and the cyclical nature of darkness and light in the history of Andaluc a At once personal and far reaching Granada is an epic journey through the soul of this most iconic of cities **Higher Education Exchange**

Every human is born with multifarious potential Why then do parents schools and employers insist that we restrict our many talents and interests that we specialise in just one We ve been sold a myth that to specialise is the only way to pursue truth identity or even a livelihood Yet specialisation is nothing but an outdated system that fosters ignorance exploitation and disillusionment and thwarts creativity opportunity and progress Following a series of exchanges with the world s greatest historians futurists philosophers and scientists Waqas Ahmed has weaved together a narrative of history and a vision for the future that seeks to disrupt this prevailing system of unwarranted hyper specialisation In The Polymath Waqas shows us that there is another way of thinking and being Through an approach that is both philosophical and practical he sets out a cognitive journey towards reclaiming your innate polymathic state Going further he proposes nothing less than a cultural revolution in our education and professional structures whereby everyone is encouraged to express themselves in multiple ways and fulfil their many sided potential Not only does this enhance individual fulfilment but in doing so facilitates a conscious and creative society that is both highly motivated and well equipped to address the complexity of 21st century challenges **Civilization**

Scientific and Political Freedom in Islam Uriya Shavit,2017-02-24 The modernist apologetic approach to the relation between revelation and science and politics has been a central part of Arab discourses on the future of Muslim societies for over a century This approach introduced historical and theological narratives and interpretative mechanisms that contextualize reason and freedom in Islamic terms to argue that unlike with Christianity it is possible for Muslim societies to be technologically and politically advanced without forfeiting revelation as an all encompassing legally binding guide

Scientific and Political Freedom in Islam critically examines the coherence and consistency of modernist apologetic scholars This is done through a discussion of their general theorizing on reason and freedom which is then followed by discussions of their commentaries on specific scientific and political issues in light of their general theorizing Regarding the former the focus is Darwin s theory of evolution while the universality of the Biblical flood the heliocentric model the Big Bang model and Freudianism are also discussed Regarding the latter the focus is Islam s desired structure of government and concept of participatory politics while individual freedoms are also discussed The book argues that the modernist apologetic approach has great potential to be a force for liberalization but also possesses inherent limitations that render its theory on the relation between revelation and freedom self contradictory Introducing a significant body of new information on the reasons for the failure of secularism and democracy and the attitudes towards Darwinism in the Arab world this book is a valuable resource for students and scholars of Islamic Studies comparative religion democracy studies and evolution studies
