Below are free-body diagrams for three electric charges that lie in the same plane. Their relative positions are unknown.

Part A

Along which of the lines (A to H) in the figure should charge 2 be placed so that the free-body diagrams of charge 1 and charge 2 are consistent?

**Hint A.1 How to approach the problem**

Newton's 3rd law states that the forces exerted by a pair of objects on each other are always equal in magnitude and opposite in direction. Identifying the forces that correspond to 3rd-law pairs in the free-body diagrams will enable you to place the particles in their proper relative position.

Hint A.2 Placing Charge 2

The two forces acting on charge 2 correspond to the forces exerted on it by charge 1 and charge 3. This means that one of these forces must pair with a force on charge 1 of equal magnitude and opposite direction and the other must pair with a force on charge 3 of equal magnitude and opposite direction. Also note that charge 2 should be repelled by charge 1, since both are negative. Therefore, the vector that represents the force of charge 1 on charge 2 must point away from charge 1. This information is all you need to place charge 2 in its correct position.

ANSWER:

C

Part B

Along which of the lines (A to H) in the figure should charge 3 be placed so that the free-body diagrams of charge 1, charge 2, and charge 3 are consistent?

When the first edition of University Physics by Francis W Sears and Mark W Zemansky was published in 1949 it was
revolutionary among calculus based physics textbooks in its emphasis on the fundamental principles of physics and how to
apply them The success of University Physics with generations of several million students and educators around the world is
a testament to the merits of this approach and to the many innovations it has introduced subsequently In preparing this First
Australian SI edition our aim was to create a text that is the future of Physics Education in Australia We have further
enhanced and developed University Physics to assimilate the best ideas from education research with enhanced problem
solving instruction pioneering visual and conceptual pedagogy the first systematically enhanced problems and the most
pedagogically proven and widely used online homework and tutorial system in the world Mastering Physics
