Lawyers and the Rule of Law Andrew Boon, 2022-10-20 This book examines lawyers' contributions to creating and maintaining the rule of law, one of the pillars of a liberal democracy. It moves from the European Enlightenment to the modern day, exploring the role of judges, government lawyers, and private practitioners in creating, defining, and being defined by the demands of modern society. The book is divided into 4 parts representing the big themes. The first part considers lawyers' contribution to the growth of constitutionalism; the second, the formulation of roles and identities; and the third, the formation of values. The fourth part focuses on the challenges faced by lawyers and the rule of law in the past 50 years, the neoliberal period, and how they challenge both conceptions of lawyers and the rule of law. Each part is illustrated by defining events from the execution of Charles I through the Nuremberg Trials to the insurrection by supporters of Donald Trump in January 2021. Although the focus is on England and Wales, parallel developments in other jurisdictions, Australia, Canada, New Zealand, and the USA, are considered. This allows analysis of lawyers' historical and contemporary engagement with the rule of law in jurisdictional systems based on the Common Law. Each chapter is thematic, but the passage through the book is broadly chronological.

The Marginal Soils of Africa Adornis Dakarai Nciizah, Ashira Roopnarain, Busiswa Ndaba, Mashapa Elvis Malobane, 2024-04-25 This book addresses the pressing challenges of climate change, land scarcity, and food security, offering a comprehensive synthesis of research on using, managing, and reclaiming marginal lands in Africa. Unfavourable climatic conditions and rapid population growth intensify competition for land, putting pressure on traditional agricultural soils, thus necessitating a transition towards underutilized marginal lands. Reclaiming these damaged and undervalued areas through various technologies presents a promising path, not only to food independence but also to second-generation biofuel feedstock production, utilizing excess biomass from these revived lands. While recent years have seen increased focus on restoring degraded lands, a crucial gap remains: a unified knowledge base detailing the efficacy of various reclamation technologies. This book fills that void, empowering farmers and policymakers with the insights they need to make informed decisions, mobilize resources effectively, and ultimately help Africa meet its projected 60% food demand increase.

Culturally and Linguistically Diverse Learners and STEAM Pamela Spycher, Erin F. Haynes, 2019-03-01 Multilingual students, multilingual students, and students learning English as an additional language constitute a substantial and growing demographic in the United States. But these groups of students tend to receive unequal access to and inadequate instruction in Science, Technology, Engineering, Arts, and Mathematics (STEAM), with their cultural and linguistic assets going largely

unacknowledged and underutilized The need for more information about quality STEAM education for culturally and linguistically diverse students is pressing This book seeks to address this need with chapters from asset oriented researchers and practitioners whose work offers promising teaching and learning approaches in the STEAM subjects in K 16 education settings Authors share innovative ways in which classroom teachers integrate disciplinary reading writing discussion and language development with content knowledge development in STEAM subjects Also shared are approaches for integrating indigenous epistemologies culturally sustaining pedagogy and students linguistic resources and life experiences into classroom teaching The value of quality STEAM education for all students is an equity issue a civics issue and an economic issue Our technologically driven scientifically oriented innovative society should be led by diverse people with diverse ways of approaching and being in the world This book aims to make quality STEAM education a reality for all students taking into account the many perspectives bodies of knowledge and skills they bring from a range of cultural and linguistic backgrounds with the ultimate goal of strengthening the fields that will drive our society towards the future There are three primary audiences for this book teachers both in service and pre service teachers teacher educators both pre service preparation and professional learning and applied researchers Whatever their current or evolving role readers are encouraged to use this book and the inquiry questions provided at the end of each chapter as a launching point for their own important work in achieving equity in STEAM education
