Nancy Woloch,2015-04-20 A Class by Herself explores the historical role and influence of protective legislation for American women workers both as a step toward modern labor standards and as a barrier to equal rights Spanning the twentieth century the book tracks the rise and fall of women only state protective laws such as maximum hour laws minimum wage laws and night work laws from their roots in progressive reform through the passage of New Deal labor law to the feminist attack on single sex protective laws in the 1960s and 1970s Nancy Woloch considers the network of institutions that promoted women only protective laws such as the National Consumers League and the federal Women s Bureau the global context in which the laws arose the challenges that proponents faced the rationales they espoused the opposition that evolved the impact of protective laws in ever changing circumstances and their dismantling in the wake of Title VII of the Civil Rights Act of 1964 Above all Woloch examines the constitutional conversation that the laws provoked the debates that arose in the courts and in the women s movement Protective laws set precedents that led to the Fair Labor Standards Act of 1938 and to current labor law they also sustained a tradition of gendered law that abridged citizenship and impeded equality for much of the century Drawing on decades of scholarship institutional and legal records and personal accounts A Class by Herself sets forth a new narrative about the tensions inherent in women only protective labor laws and their consequences

Scotland, 1797-1848 Martin Mitchell,2001-01-01 The prevailing historical view of the Catholic Irish in the first half of nineteenth century Scotland is that they were despised by native workers because of their religion and because most were employed as strike breakers or low wage labour As a result of this hostility the Catholic immigrants were viewed as a separate isolated community concerned mainly with Irish and Catholic issues and unable or unwilling to participate in trade unions strikes and radical reform movements The Protestant Irish immigrants on the other hand were believed to have integrated with little difficulty mainly because of religious families and cultural ties with the Scots This study presents a radically different view It demonstrates that whereas some Irish workers were used as a blackleg or cheap labour others participated in trade unions and strikes alongside native workers most notably in spinning weaving and mining industries The various agitations for political change in the region are analysed revealing that the Irish Catholic and Protestant were significantly involved in all of them It is also shown that Scottish reformers welcomed and indeed actively sought Catholic Irish participation The campaigns for Catholic emancipation and the repeal of the Act of Union of 1800 are reviewed as are the attitudes of the Scottish Catholic clergy to the political activities of their overwhelmingly Irish congregations

White Mineworkers on Zambia's Copperbelt, 1926-1974

Duncan Money, 2021-12-06 Life and work on the Zambian Copperbelt a concentrated industrialised mining region along the border with DR Congo has been a perennial subject for Africanist historians In this book Duncan Money for the first time focusses on the white mineworkers who monopolised skilled jobs on the mines from the 1920s to the 1960s and became one of the most affluent groups of workers on the planet Money argues that this group was a highly mobile global workforce which constituted and saw itself as a racialised working class For much of the twentieth century this white working class moved between mining and industrial centres across and beyond the British Empire and their actions and forms of organisation were strongly influenced by their international connections and by their mobility These transnational connections and the white working class militancy they produced played a crucial role in shaping social categories of race and class on the Copperbelt and determining the evolution of a region which quickly became one of the world's largest sources of copper See inside the book **The Academy and Literature**, 1905
