until we can identify and begin to address what is absent teacher education will be constrained by a perennial recycling of concerns that have characterized so much of research policy and practice to date If teacher education is to have a different future we need to ask different and difficult questions This book with contributions from theorists in Australia Canada and the United States addresses the challenges we face in establishing a more hopeful future for teacher education The authors provocative contributions identify what is missing in teacher education while providing critical counterpoints to existing frames of reference in the field In writing against the grain they open up new conceptual spaces and exciting trajectories for a different teacher education
