Denver Public Library. Conservation Library, 1974 **Evolution in the Here and Now** Nigel Barber, 2020-05-12 This book argues that the two most influential theories on modern human behavior cultural determinism and evolutionary psychology are quite inadequate Cultural deterministic theories deny personal experience and too often fall prey to anthropocentric bias Most evolutionary psychologists argue that humans are shaped to fit our ancestral past effectively freezing us in time Evolution in the Here and Now looks to new factors like social learning and adaptation to explain the idiosyncrasies of human behavior in a more complete and nuanced way Evolutionary psychologist Nigel Barber shows that human behavior is uniquely crafted by the surrounding environment in underappreciated and surprising ways For example commerce and agriculture can be interpreted as adaptive alternatives to hunting and gathering Irrigated farming was a response to land scarcity which ultimately permitted the rise of early cities This cross disciplinary approach unites the missing ingredients

that have for so long impeded our understanding of our own species and its variation across cultures *Evolution in the Here and Now* is a bold step forward in the evolutionary understanding of human behavior that marries our biology with our history in ways that have never been attempted before Natural Areas Journal ,2008 Subject Guide to Books in Print ,1993 **Subject Collections** Stephen Calvert,1978 Classified bibliography of special collections of documentation and subject emphases as reported by various library services and museums in the USA and Canada *Rewilding the World* Caroline Fraser,2014-04-29 A Library Journal Best Sci Tech Book of the Year A gripping account of the environmental crusade to save the world's most endangered species and landscapes the last best hope for preserving our natural home Scientists worldwide are warning of the looming extinction of thousands of species from tigers and polar bears to rare flowers birds and insects If the destruction continues a third of all plants and animals could disappear by 2050 and with them earth's life support ecosystems that provide our food water medicine and natural defenses against climate change Now Caroline Fraser offers the first definitive account of a visionary campaign to confront this crisis rewilding Breathtaking in scope and ambition rewilding aims to save species by restoring habitats reviving migration corridors and brokering peace between people and predators Traveling with wildlife biologists and conservationists Fraser reports on the vast projects that are turning Europe's former Iron Curtain into a greenbelt creating trans frontier Peace Parks to renew elephant routes throughout Africa and linking protected areas from the Yukon to Mexico and beyond An inspiring story of scientific discovery and grassroots action *Rewilding the World* offers hope for a richer wilder future
