Abstract: *Microtus pennsylvanicus* (Rodentia: Muridae) is a common species in the western United States. It is a small rodent with a long tail, large ears, and a long snout. It is found in a wide variety of habitats, including grasslands, shrublands, and forests. It is a herbivore, feeding on a variety of plant materials, including grasses, seeds, and roots. It is a social animal, living in groups called colonies. It is a common pest of crops and stored grain.

When considering the overall picture for these communities, there are two elements to think about: (1) the degree to which the communities are following the trend in other regions, and (2) the local situation. Looking at the data and the trend in other regions, there is a mixed picture, with several groups performing better than others, while others are doing poorly. From a local perspective, the picture is somewhat mixed. The 10 cities studied in this case showed that the local situation is mixed, but most were performing well, and the picture was mixed.
