Lawrence, 2007 From left to right on the political spectrum there is at least one note of agreement the nation's school system has not delivered universal quality education Accordingly debate has raged over how to rectify this situation Should the government increase funding encourage privatisation some of both Another option though has emerged and is seemingly gaining popularity home schooling Citing both substandard education and displeasure with school environments and curricula many parents have decided to teach their own children Supporters say it is well within their rights to raise their children as they see fit and that at home learning is superior to the public system Detractors claim that home schooled children are deprived of social interaction and the broad based education provided by the system Neither side wants to cede ground making the issue of home schooling an integral part of a wider national debate on education In this book the specific topic of home schooling is presented from all relevant sides to give a complete picture of the present status of the issue and its potential for future resolution Following this overview is a thorough and carefully selected bibliography of literature about home schooling from all viewpoints Easy access to this important resource is then provided via author title and subject indexes *Homeschooling in America* Joseph Murphy, 2014-02-04 This revealing and balanced portrait of homeschooling today provides a full history of the movement demographic insights and extensive research on how homeschooled children fare in the United States Delving into a movement that impacts more students nationwide than the entire charter school movement this book explores The history of homeschooling in America How this movement has grown in credibility and enrollment exponentially The current state of homeschooling including questions about who gets homeschooled why and what is the success academically and in life of students who are homeschooled The impact of homeschooling on the student and on American society In 2010 more than two million students were homeschooled In the most extensive survey and analysis of research on homeschooling spanning the birth of the movement in the 1970s to today Homeschooling in America shines a light on one of the most important yet least understood social movements of the last forty years and explores what it means for education today *ECEL 2016* -
