**Homicide** Martin Daly, Margo Wilson, 2017-07-12 The human race spends a disproportionate amount of attention money and expertise in solving trying and reporting homicides as compared to other social problems The public avidly consumes accounts of real life homicide cases and murder fiction is more popular still Nevertheless we have only the most rudimentary scientific understanding of who is likely to kill whom and why Martin Daly and Margo Wilson apply contemporary evolutionary theory to analysis of human motives and perceptions of self interest considering where and why individual interests conflict using well documented murder cases This book attempts to understand normal social motives in murder as products of the process of evolution by natural selection They note that the implications for psychology are many and profound touching on such matters as parental affection and rejection sibling rivalry sex differences in interests and inclinations social comparison and achievement motives our sense of justice lifespan developmental changes in attitudes and the phenomenology of the self This is the first volume of its kind to analyze homicides in the light of a theory of interpersonal conflict Before this study no one had compared an observed distribution of victim killer relationships to expected distribution nor asked about the patterns of killer victim age disparities in familial killings This evolutionary psychological approach affords a deeper view and understanding of homicidal violence *Homicide* Martin Delay, Margo Wilson, 1988-01-01 The

the slow crumbling of a once happy marriage a romantic breakup that turns nasty When Men Behave Badly shows that this battle of the sexes is deeper and far more pervasive than anyone has recognized revealing the hidden roots of sexual conflict roots that originated over deep evolutionary time which define the sexual psychology we currently carry around in our 3 5 pound brains Providing novel insights into our minds and behaviors When Men Behave Badly presents a unifying new theory of sexual conflict and offers practical advice for men and women seeking to avoid it      **Homicide and Organised Crime**

The Evolutionary History of Witch-hunting Steije Hofhuis, 2024-12-06 Why did early modern Europeans hunt for witches Were these persecutions a shrewd tool to oppress women or the poor or were they just a way of making money Or were witch hunters primarily driven by a genuine belief in witchcraft The witches sabbath the diabolical pact and the nightly flight were elements in the early modern concept of witchcraft that seem to have been intelligently designed to trigger persistent witch persecutions But in contrast to what many past historical scholars presumed witch hunts were not based on intelligent design So how to explain them This book proposes a new model Darwinian cultural evolution It contends that witch hunting's apparent design emerged from a hidden evolutionary process in which cultural variants which accidentally unleashed larger persecutions were cumulatively preserved Witch hunting did not so much evolve to serve human interests but to ensure its own selfish reproduction Historians have often compared witch persecutions to the outbreaks of contagious disease but only as a figure of speech But shouldn't we take the similarities more seriously This book argues that witch hunting was a cultural virus that spread at the expense of its human hosts and thus bridges the gap between qualitative history and the burgeoning field of Darwinian
