**Our old home, and English notebooks** Nathaniel Hawthorne, 1891      Boats Against the Current Lewis Perry, 2002-08  
Boats Against the Current provides a fascinating account of how American culture emerged from the sheltered elitist world of the eighteenth century into the dynamic turbulent civilization that reached full bloom after the Civil War The antebellum years were times of flux and change years of a society rushing into the western wilds muscular and ambitious yet haunted by uncertainty about its future and its past Renowned scholar Lewis Perry begins his study with a fresh look at Andrew Jackson vividly recreating a time when Americans feeling their ties to the past disintegrating fostered a new fascination with history Then Perry introduces us to the observations of such articulate foreign travelers as Alexis de Tocqueville and Fredrika Bremer He deftly weaves together these writers perspectives to provide a fascinating look at our emergent nation Here too are the women of the cities and frontier the peddlers preachers and showmen along with such writers as Hawthorne Emerson Whittier and Parker Perry brings these personalities and writings together to show us how early nineteenth century America saw itself in both its promise and its fears Now available for the first time in paperback Boats Against the Current offers a brilliant portrait of a society in the midst of change expansion and reflection about its own future and past Written by one of our leading intellectual historians it makes a major contribution to our understanding of the emergence of modern American culture      *The National Union Catalog, Pre-1956 Imprints* Library of Congress, American Library Association. Gerald Kennedy, Leland S. Person, 2014-06-26 The Oxford History of the Novel in English is a 12 volume series presenting a comprehensive global and up to date history of English language prose fiction and written by a large international team of scholars The series is concerned with novels as a whole not just the literary novel and each volume includes chapters on the processes of production distribution and reception and on popular fiction and the fictional sub genres as well as outlining the work of major novelists movements traditions and tendencies In thirty four essays this volume reconstructs the emergence and early cultivation of the novel in the United States Contributors discuss precursors to the U S novel that appeared as colonial histories autobiographies diaries and narratives of Indian captivity religious conversion and slavery while paying attention to the entangled literary relations that gave way to a distinctly American cultural identity The Puritan past more

than two centuries of Indian wars the American Revolution and the exploration of the West all inspired fictions of American struggle and self discovery A fragmented national publishing landscape comprised of small local presses often disseminating odd experimental forms eventually gave rise to major houses in Boston New York and Philadelphia and a consequently robust culture of letters Dime novels literary magazines innovative print technology and even favorable postal rates contributed to the burgeoning domestic book trade in place by the time of the Missouri Compromise Contributors weigh novelists of this period alongside their most enduring fictional works to reveal how even the most American of novels sometimes confronted the inhuman practices upon which the promise of the new republic had been made to depend Similarly the volume also looks at efforts made to extend American interests into the wider world beyond the nation s borders and it thoroughly documents the emergence of novels projecting those imperial aspirations

**Victorian London** Liza Picard, 2014-01-28 To Londoners the years 1840 to 1870 were years of dramatic change and achievement As suburbs expanded and roads multiplied London was ripped apart to build railway lines and stations and life saving sewers The Thames was contained by embankments and traffic congestion was eased by the first underground railway in the world A start was made on providing housing for the deserving poor There were significant advances in medicine and the Ragged Schools are perhaps the least known of Victorian achievements in those last decades before universal state education In 1851 the Great Exhibition managed to astonish almost everyone attracting exhibitors and

visitors from all over the world But there was also appalling poverty and exploitation exposed by Henry Mayhew and others For the laboring classes pay was pitifully low the hours long and job security nonexistent Liza Picard shows us the physical reality of daily life in Victorian London She takes us into schools and prisons churches and cemeteries Many practical innovations of the time flushing lavatories underground railways umbrellas letter boxes driving on the left point the way forward But this was also at least until the 1850s a city of cholera outbreaks transportation to Australia public executions and the workhouse where children could be sold by their parents for as little as 12 and streetpeddlers sold sparrows for a penny tied by the leg for children to play with Cruelty and hypocrisy flourished alongside invention industry and philanthropy

**The Materials of Exchange between Britain and North East America, 1750-1900** Daniel Maudlin, Robin Peel, 2016-03-03 Taking a multidisciplinary approach to the complex cultural exchanges that took place between Britain and America from 1750 to 1900 The Materials of Exchange examines material visual and print culture alongside literature within a transatlantic context The contributors trace the evolution of Anglo American culture from its origins as a product of the British North Atlantic Empire through to its persistence in the post Independence world of the nineteenth and early twentieth centuries While transatlanticism is a well established field in history and literary studies this volume recognizes the wider diversity and interactions of transatlantic cultural production across material and visual cultures as well as literature As such while encompassing a range of fields and approaches within the humanities the ten chapters are all concerned with understanding and interpreting the same Anglo American culture within the same social contexts The chapters integrate the literary with the material offering alternative and provocative perspectives on topics

ranging from the child made book to representations of domestic slaves in literature by way of history painting travel writing architecture and political plays By focusing on cultural exchanges between Britain and the north eastern maritime United States over nearly two centuries the collection offers an in depth study of Britain s relationship with a single region of North America over an extended historic period Contributors have resisted the temptation to prioritize the relationship between New England and England in particular by placing this association within the contexts of Atlantic exchanges with other northeastern states as well as with the South the Caribbean and Scotland Intended for researchers in literature visual and material culture this collection challenges single subject boundaries by redefining transatlantic studies as the collective examination of the complex and interrelated cultural t

**Writing Art History in the Nineteenth Century** Hilary Fraser, 2014-09-04 This book sets out to correct received accounts of the emergence of art history as a masculine field. It investigates the importance of female writers from Anna Jameson, Elizabeth Eastlake and George Eliot to Alice Meynell, Vernon Lee and Michael Field in developing a discourse of art notable for its complexity and cultural power, its increasing professionalism and reach and its integration with other discourses of modernity. Proposing a more flexible and inclusive model of what constitutes art historical writing, including fiction, poetry and travel literature, this book offers a radically revisionist account of the genealogy of a discipline and a profession. It shows how women experienced forms of professional exclusion that, whilst detrimental to their careers, could be aesthetically formative. How working from the margins of established institutional structures gave women the freedom to be audaciously experimental in their writing about art in ways that resonate with modern readers.
