in Margaret Chase Smith's America Gregory P. Gallant, 2014-09-24 Hope and Fear in Margaret Chase Smith's America A
Continuous Tangle provides a fresh interpretation of the life career and legacy of former United States Senator Margaret
Chase Smith the first woman elected to both houses of the U S Congress The book examines the critical connections made by
Smith to key policymakers links that allowed her to overcome opposition and prejudice to gain access influence and power in
Washington D C Highlighting the tangle of personalities and events in America from 1940 to 1972 the book focuses on Smith
s courageous and often solitary efforts on behalf of women during the 1940s and her stand during the McCarthy era which
earned her a national reputation for civility in public discourse It also examines her key interactions with the group of U S
Senators who were elected with her in 1948 and their work to forge public policy in the aftermath of McCarthyism including
domestic and international policy following Sputnik the creation of the Space Program civil rights Vietnam and Medicare
Against these events and activities the book demonstrates the impact of the nation s commitment to anticommunism and
nuclear weapons which allowed politicians like Margaret Chase Smith to embrace contradictory stances on political dissent
military policy and the role of government in American society Math Education for America? Mark Wolfmeyer, 2013-12-04
Math Education for America analyzes math education policy through the social network of individuals and private and public
organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public
schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics
Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national
math education curriculum by employing a unique social network analysis Breaking new ground in detailing and theorizing
the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of
interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed
content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the
interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math
education reform are aligned with the prevailing political agendas of this social network rather than the national interest
