

The background of the cover features a close-up of a laboratory test tube held at an angle. A bright blue flame from a Bunsen burner is visible at the bottom, heating the bottom of the test tube. The test tube contains a liquid that is glowing with an orange-red light, suggesting a chemical reaction or a specific substance being heated. The background is dark with some colorful, out-of-focus light spots, possibly from other experiments or laboratory equipment.

[Study Guide and Solutions Manual to Accompany Fundamentals of Organic Chemistry McMurry, Susan McMurry, 1990](#) [Study Guide and Solutions Manual for Organic Chemistry Susan McMurry, 1992](#) John McMurry's best selling text presents organic chemistry in a new edition that is up to date beautifully written visually striking and pedagogically sound Described by many of its users as an eminently

teachable text McMurry sets the standard in the field The writing style has received almost universal acclaim from its users McMurry introduces new concepts only as needed and immediately illustrates them with concrete examples And wherever possible he ties material together with brief reviews overviews and reaction summaries The result is a text that helps students mentally organize the material a text that helps them understand concepts not just memorize facts and a text that helps them make sense of the voluminous amount of material they encounter in the study of organic chemistry McMurry uses a simple but important polar reaction the addition of HBr to an alkene as the lead off reaction to illustrate the general principles of organic reactions Users of former editions found this an excellent choice because of its relative simplicity no prior knowledge of chirality or kinetics is required and its importance as a polar reaction on a common functional group that offers students the key to understanding hundreds of thousands of ionic reactions By selecting this particular model McMurry is able to offer an unusually early presentation of organic reactions *Holt Chemistry* Ralph Thomas Myers, 2004
