Urban Regeneration and Neoliberalism Clare Kinsella, 2020-10-29 This book explores the concept of home in Liverpool over phases of regeneration following the Second World War Using qualitative research in the oral history tradition it explores what the author conceptualises as forward facing regeneration in the period up to the 1980s and neoliberal regeneration interventions that prioritise the past from the 1980s to the present The author examines how the shift towards city centre focused redevelopment and event led initiatives has implications for the way residents make sense of their conceptualisations of home and demonstrates how the shift in regeneration focus discourse and practice away from Liverpool s neighbourhood districts and towards the city centre has produced changes in the ways that residents identify with neighbourhoods and the city centre with prominence being given to the latter Employing Pierre Bourdieu s concepts of habitus and field as mechanisms for understanding different senses of home and shifts from localised views to globalised views this book will appeal to those with interests in urban sociology regeneration geography sociology home cultures and cities *Detroit, American Urban Renaissance* Arthur M. Ward,2004-02-18 Fully revised and thoroughly updated the Second Edition of Planning and Urban Change provides an accessible yet richly detailed account of British urban planning Stephen Ward demonstrates how urban planning can be understood through three categories ideas urban planning history as the development of theoretical approaches from radical and utopian beginnings to the new right thinking of the 1980s and recent interest in green thought and sustainability policies urban planning history as an intensely political process the text explains the complicated relation between planning theory and political practice and impacts urban planning history as the divergence of expectation and outcome each chapter shows how intended impacts have been modified by economic and social forces This Second Edition features an entirely new chapter on the key policy changes that have occurred under the Major and Blair governments together with a critical review of current policy trends **Sustainable Urban Neighbourhood** David Rudlin,Nicholas Falk,2010-05-14 This successful

title previously known as Building the 21st Century Home and now in its second edition explores and explains the trends and issues that underlie the renaissance of UK towns and cities and describes the sustainable urban neighbourhood as a model for rebuilding urban areas The book reviews the way that planning policies architectural trends and economic forces have undermined the viability of urban areas in Britain since the Industrial Revolution Now that much post war planning philosophy is being discredited we are left with few urban models other than garden city inspired suburbia Are these appropriate in the 21st century given environmental concerns demographic change social and economic pressures The authors suggest that these trends point to a very different urban future The authors argue that we must reform our towns and cities so that they become attractive humane places where people will choose to live The Sustainable Urban Neighbourhood is a model for such reform and the book describes what this would look like and how it might be brought about The Rough Road to Renaissance Jon C.
