Homeland Security James J. F. Forest, 2006-06-30 America is a target the homeland is under threat While Americans have been targets of terrorist attacks for quite some time September 11 2001 awoke the nation to the reality that we are vulnerable in our homes our places of work and worship and our means of public transportation And yet we must continue to function as best we can as the world's most vibrant economic and political community The current threat environment requires greater engagement with the public as the necessary eyes and ears of the nation's homeland security infrastructure However to be effective the public must be equipped with the knowledge of where and why specific locations and activities may be a terrorist target what is being done to protect those targets and how they can help This three volume set answers that need The chapters of each volume of Homeland Security revolve around a core of central questions Are we safer today than we were pre 9 11 What steps have been taken in all these areas to protect ourselves What are the threats we face and what new threats have developed since 9 11 Are we staying one step ahead of those who wish to do us harm In 2002 more than 400 million people 122 million cars 11 million trucks 2.4 million freight cars and 8 million containers entered the United States Nearly 60 000 vessels entered the United States at its 301 ports of entry Clearly the amount of activity this represents will require a long term commitment to innovation organizational learning and public vigilance to complement an already overstretched network of government agencies and security professionals , Armed groups: Studies in National Security, Counterterrorism, and Counterinsurgency Jeffrey H. Countering Terrorism and Insurgency in the 21st Century James J. F. Forest, 2007-06-30 The attacks of September 11 2001 inaugurated a new global era of counterterrorism policy and activity led by the United States Countering Terrorism and Insurgency in the 21st Century analyzes the most significant dimensions of combating terrorism including considerations of strategic and tactical issues hard power soft power and counterintelligence the need to thwart sources and facilitators weak governments ill conceived foreign policy and trafficking in drugs guns and humans and the incorporation of lessons learned thus far from combating terrorism around the globe Since the dawn of the new millennium combating terrorism has become a primary focus of security professionals throughout the world The attacks of September 11 2001 inaugurated a new global era of counterterrorism policy and activity led by the United States while many countries from Algeria and Spain to Sri Lanka and Indonesia have redoubled their efforts to combat their own indigenous terrorism threats In the United States the counterterrorism goals identified in the National Strategy for Combating Terrorism 2006 can only be achieved through significant multinational cooperation These goals are to advance effective democracies as the long term antidote to the ideologies of terrorism to prevent attacks by terrorist networks to deny terrorists the support and sanctuary of rogue states to deny terrorists control of any nation they would use as a base and launching pad for terror and to lay the foundations and build the institutions and structures we need to carry the fight forward against terror and help ensure our ultimate success At this point in the development of the global counterterrorism efforts it is particularly important to pause for reflection on a number of critical questions What do we know about effectively countering terrorism What are the characteristics of successful or unsuccessful counterterrorism campaigns What do we need to learn in order to do this better Countering Terrorism and Insurgency in the 21st Century addresses these and related questions contributing to national security policy as well as to our understanding of the terrorist threat and how it can be defeated Volume 1 Strategic and Tactical Considerations examines issues of hard power soft power and intelligence counterintelligence Volume 2 Sources and Facilitators covers state failure border controls democracy promotion networks and trade and trafficking and societal issues Volume 3 Lessons Learned from Combating Terrorism and Insurgency includes case studies of counterterrorism operations e g the hijacking of the Achille Lauro the 1993 bombing of the World Trade Center and the capture of key terrorist suspects like Ramzi Youssef and Khalid Sheikh Mohamad and case studies of long term efforts to combat terrorism e g the Basques in Spain the Tamil Tigers in Sri Lanka Israel's struggle against Palestinian terror organizations Peru and Sendero Luminoso and Japan and Aum Shinrikyo **Oil and Terrorism in the New Gulf** James J.F. Forest, Matthew V. Sousa, 2006-03-07 Oil and Terrorism in the New Gulf examines the national security implications of U S energy security policies in the Middle East and

the emerging U S involvement in oil exploration and extraction in West Africa Similar political social and economic challenges _poverty corruption lack of infrastructure and weak governments_ are seen in the oil producing states of both the Middle East and Africa Drawing comparisons between these two regions allows Forest and Sousa to formulate policy recommendations for how to handle foreign policy toward Africa in the future based on lessons learned from past interaction with the Middle East Oil and Terrorism in the New Gulf promises to inform a lively debate over the future of U S foreign policies toward Africa and is a valuable resource for policymakers and the academic community that should be approached in a coherent integrated fashion to ensure the success of the United State s energy and national security agendas The Global Illusion of Citizen Protection Robert Mandel,2018-07-11 This book comprehensively analyzes the global illusion of citizen protection so common today This text helps students understand a central puzzle in human security which has two distinct components 1 although it might be reasonable to assume that political leaders threat responses would almost always have a decent chance of safeguarding the mass public sometimes they do not exhibiting rhetoric reality gaps and purely symbolic gestures and 2 although the wealth of security information available to the mass public would seem to provide them with the opportunity to gain almost always an accurate picture of existing dangers and state threat responses sometimes citizens evaluation of their own safety is grossly distorted exhibiting an overly extreme sense of helplessness about ongoing threat and an overly extreme sense of skepticism about state protection At first glance it is difficult to comprehend fully why states would often select ineffective means of protecting their citizens assuming the availability of other options when it appears that there are incentives for them to choose effective ones particularly within societies with responsive forms of government and why citizens would often mischaracterize their own security predicament when they have a direct on the ground view of their plight and seem to have incentives to view their own safety accurately In exploring these puzzles through detailed international case study analysis this text investigation consciously deviates from some prevailing orthodox assumptions It call into question the desirability of the political centrality of state authority and of the prevailing economic and cultural norms in today s world opening up serious questions about when and how existing structures and values contribute to increasing rather than decreasing human insecurity for the average world citizen **Armed Groups** Jeffrey H. Norwitz,2008-08-05 Product Description Discussion of armed groups which are considered to include classic insurgents terrorists guerrillas militias police agencies criminal organizations war lords privatized military organizations mercenaries pirates drug cartels apocalyptic religious extremists orchestrated rioters and mobs and tribal factions To study armed groups use of history political science anthropology sociology theology and economics are traditional areas of research The book also delves into matters of ethics technology intelligence education the law diplomacy military science and even mythology The book is divided into five sections History and armed groups Present context and environment Religion and inspiration thinking differently about armed groups the shpae of things to come *Pirates, Terrorists, and Warlords* Jeffrey H.

After 9/11 - Rethinking the Jihadist Threat Arabinda Acharya,2013-03-05 Ten years after the 9 11 attacks this book reassesses the effectiveness of the War on Terror considers how al Qaeda and other jihadist movements are faring explores the impact of wider developments in the Islamic world such as the Arab Spring and discusses whether all this suggests that a new approach to containing international especially jihadist terrorism is needed Among the book s many richly argued conclusions are that the War on Terror and the invasions of Afghanistan and Iraq have brutalised the United States that the jihadist threat is not one but rather a wide range of separate unconnected struggles and that al Qaeda s ideology contains the seeds of its own destruction in that although many Muslims are content to see the United States worsted they do not approve of al Qaeda s violence and are not taken in by the jihadists empty promises of utopia [Homeland Security \[3 Volumes\]](#)

The Child in Post-Apocalyptic Cinema Debbie Olson, 2015-03-06 The child in many post apocalyptic films occupies a unique space within the narrative a space that oscillates between death and destruction faith and hope The Child in Post Apocalyptic Cinema interrogates notions of the child as a symbol of futurity and also loss By exploring the ways children function discursively within a dystopian framework we may better understand how and why traditional notions of childhood are repeatedly tethered to sites of adult conflict and disaster a connection that often functions to reaffirm the rightness of past systems of social order This collection features critical articles that explore the role of the child character in post
