The collected papers of Albert Einstein: The Berlin years : correspondence, January -- December 1921 Albert Einstein, 2009

The Collected Papers of Albert Einstein, Volume 15 Albert Einstein, 1987 This volume covers one of the most thrilling two year periods in twentieth century physics as matrix mechanics developed chiefly by W Heisenberg M Born and P Jordan and wave mechanics developed by E Schrödinger supplanted the earlier quantum theory The almost one hundred writings by Einstein of which a third have never been published and the more than thirteen hundred letters show Einstein's immense productivity and hectic pace of life Einstein quickly grasps the conceptual peculiarities involved in the new quantum mechanics such as the difference between Schrödinger's wave function and a field defined in spacetime or the emerging statistical interpretation of both matrix and wave mechanics Inspired by correspondence with G Y Rainich he investigates with Jakob Grommer the problem of motion in general relativity hoping for a hint at a new avenue to unified field theory Einstein falls victim to scientific fraud when in a collaboration with E Rupp he becomes convinced that the latter's experiments aimed at deciding whether excited atoms emit light instantaneously in quanta or in a finite time in waves confirm a wave theoretic explanation While it was known that the teenage Einstein had been romantically involved with Marie Winteler in 1895 newly discovered documents reveal that his love for Marie was rekindled in 1909-10 while he was still married to Mileva Marić The 1925 Locarno Treaties renew Einstein's optimism in European reconciliation He backs the International manifesto against compulsory military service and continues his participation in the League of Nations International Committee on Intellectual Cooperation He remains intensely committed to the shaping of the Hebrew University in Jerusalem although his enthusiasm for this cause is sorely tested
