Given that communication is the lifeblood of an organization managerial leaders need to understand how to use communication strategies to build their teams to achieve organizational objectives Studies repeatedly point to the impact communication skills have on the ability of managerial leaders to succeed or fail Too often individuals move into managerial leadership roles without awareness of the need to improve their communication skills These individuals may be subject matter experts whose technical skills allowed them to succeed as individual team members but when placed in managerial leadership roles they fail because they lacked the relationship building skills needed to foster teamwork Therefore this book provides the communication principles that are so critical for today's managerial leader It builds a solid foundation while it guides readers in strategies to enhance their written oral and interpersonal communication skills Most research has stated and the author has found true in her own managerial leadership roles a leader spends the majority of his or her day interacting with others As managerial leaders individuals face many challenging situations such as determining how to inspire a shared vision about goals and objectives building trust within their unit listening with an open mind giving feedback and encouraging collaboration to name a few The focus switches for the managerial leader from doing things to leading others Therefore this book is for anyone who currently serves as a managerial leader or for anyone who desires to manage and lead others Most managerial communication books focus on the important written and oral communication skills While the author believes these skills are critically important she found in her role as a managerial leader she devoted the majority of her time to interpersonal communication Leaders need to build teams and to maintain relationships with all stakeholders The best way to make that happen is through skills such as listening asking questions and giving feedback Therefore this book includes an emphasis on interpersonal communication As Chris M Martin stated in a recent article The ability to communicate effectively may be the number one management quality Therefore this book will raise awareness relative to oral written and interpersonal communication skills so that individuals can become better managerial leaders *Optimizing Student Engagement in Online Learning Environments* Kumar, A.V. Citizenship and the Pursuit of the Worthy Life David Thunder, 2014-08-11 What does citizenship have to do with

living a worthy human life Political scientists and philosophers who study the practice of citizenship including Rawlsian liberals and Niebuhrian realists have tended to either relegate this question to the private realm or insist that ethical principles must be silenced or seriously compromised in our deliberations as citizens This book argues that the insulation of public life from the ethical standpoint puts in jeopardy not only our integrity as persons but also the legitimacy and long term survival of our political communities In response to this predicament David Thunder aims to rehabilitate the ethical standpoint in political philosophy by defending the legitimacy and importance of giving full play to our deepest ethical commitments in our civic roles and developing a set of guidelines for citizens who wish to enact their civic roles with integrity

Corporate Social Responsibility James Weber, David Wasieleski, 2018-05-14 Volume Two of Business and Society 360 focuses on research drawn from work grounded in corporate social responsibility and corporate citizenship **Perspectives on Philosophy of Management and Business Ethics** Jacob Dahl Rendtorff, 2017-01-05 This book presents a selection of articles with focus on the theoretical foundations of business ethics and in particular on the philosophy of management and on human rights and business This implies identifying and discussing conflicts as well as agreement with regard to the philosophical and other foundations of business and management Despite the general interest in corporate social responsibility and business ethics the contemporary discussion rarely touches upon the normative core and philosophical foundations of business There is a need to discuss the theoretical basis of business ethics and of business and human rights Even though the actions and activities of business may be discussed from a moral perspective not least in the media the

judgments and opinions relating to business and management often lack deeper moral reflection and consistency. Partly for this reason, business ethicists are constantly challenged to provide such moral and philosophical foundations for business ethics and for business and human rights and to communicate them in an understandable manner. Such a challenge is also of scientific kind. Positions and opinions in the academic field need to be substantiated by thorough moral and theoretical reflection to underpin normative approaches. Far too often business ethicists may agree on matters which they approach from different and sometimes irreconcilable philosophical standpoints, resulting in superficial agreement but deeper lying disagreement. In other cases it may be of high relevance to identify philosophical standpoints that despite conflicting fundamentals may arrive at conclusions acceptable to everyone.
