the ways contemporary Hawaiians are challenging the use of their traditions as the basis for exoticized entertainment Buck demonstrates that sacred chants and hula were an integral part of Hawaiian social life as the repository of the people's historical memory chants and hula practices played a vital role in maintaining the links between religious political and economic relationships Tracing the ways in which Hawaiian culture has been variously suppressed and constructed by Western explorers New England missionaries the tourist industry ethnomusicologists and contemporary Hawaiians Buck offers a fascinating rereading of Hawaiian history

Substrata Versus Universals in Creole Genesis Pieter Muysken, Norval Smith, 1986-01-01 Two of the most prominent hypotheses about why the structures of the Creole languages of the Atlantic and the Pacific differ are the universalist and the substrate hypotheses The universalist hypothesis claims essentially that the particular grammatical properties of Creole languages directly reflect universal aspects of the human language capacity and thus Creole genesis involves then the stripping away of the accretions of language history The substrate hypothesis claims on the other hand that creole genesis results from the confrontation of two systems the native languages of the colonized groups and the dominant colonial language and that the native language leaves strong traces in the resulting Creole The contributions of this groundbreaking collection present new and historical research on the old debate of substrata versus universals in Creole languages
