Reshaping the World Ernesto Castañeda, 2021-03-16 This volume provides information and analyses to better grasp the social implications of geographical borders as well as the individuals who travel between them and those who live in border regions Sociologists anthropologists philosophers linguists and scholars of international relations and public health are just some of the authors contributing to Rethinking Borders The diversity in the authors disciplines and the topics they focus on exemplify the intricacies of borders and their manifold effects This openness to so many schools of thought stands in contrast to the solidification of stricter borders across the globe The contributions range from case studies of migrants sense of belonging and safety to theoretical discussions about migration and globalization from empirical studies about immigrant practices and exclusionary laws to ethical concerns about the benefits of inclusion It is timely that this collective work is published in the middle of a pandemic that has affected every single part of the world Unprecedented border closures and stringent travel restrictions have not been enough to contain the virus entirely As COVID 19 shows diseases ideas and xenophobic and racist discourses know no borders Plans that transcend borders are vital when dealing with global threats such as climate change and pandemics Up from Slavery; an Unfinished Journey Archie Morris III D.P.A., 2019-03-21 For a period of eighty five years the M Street Dunbar High School was an academically elite all black public high school in Washington DC As far back as 1899 its students came in first in citywide tests given in both black and white schools Over this eighty five year span approximately 80 percent of M Street Dunbar's graduates went on to college even though most Americans white or black did not attend college at all Faculty and students were mutually respectful to one another and disruptions in the classroom were not tolerated Yet in this era of best practices this public high school has received virtually no attention in the literature or in policy considerations for inner city education The Dunbar High School today with its new building and athletic facilities is just another ghetto school with abysmal standards and low test score results despite the District of Columbia's record of having some of the country's highest levels of money spent per pupil The purpose of this study is to explore the history of a high school that was successful in teaching black children from low income families and to determine if the learning model employed there could be successful in a modern inner city public education environment

What happens when partisanship is pushed to its extreme In *With Ballots and Bullets* Nathan P Kalmoe combines historical and political science approaches to provide new insight into the American Civil War and deepen contemporary understandings of mass partisanship The book reveals the fundamental role of partisanship in shaping the dynamics and legacies of the Civil War drawing on an original analysis of newspapers and geo coded data on voting returns and soldier enlistments as well as retrospective surveys Kalmoe shows that partisan identities motivated mass violence by ordinary citizens not extremists when activated by leaders and legitimated by the state Similar processes also enabled partisans to rationalize staggering war casualties into predetermined vote choices shaping durable political habits and memory after the war s end Findings explain much about nineteenth century American politics but the book also yields lessons for today revealing the latent capacity of political leaders to mobilize violence
