For easier understanding, this book also makes connections among related concepts and links you to other nursing textbooks. Exemplars for each concept provide useful examples and models showing how concepts are successfully applied to practice. New to this edition are updated research evidence and a new Population Health concept. Written by conceptual learning expert Jean Giddens, this text will help you build clinical reasoning skills and prepare confidently for almost any clinical nursing situation. Authoritative content written by expert contributors and meticulously edited by concept-based learning expert Jean Giddens sets the standard for the rapidly growing concept-based curriculum movement. A total of 57 important nursing concepts are clearly defined and analyzed, spanning the areas of patient physiology, patient behavior, and the professional nursing environment. Case studies in each chapter make it easier to apply knowledge of nursing concepts to real-world situations. UNIQUE Featured Exemplars sections describe selected exemplars related to each nursing concept, covering the entire lifespan and all clinical settings, and help you assimilate concepts into practice. UNIQUE Logical framework of concepts by units and themes helps you form immediate connections among related concepts. A key to conceptual learning. UNIQUE Interrelated Concepts illustrations provide visual cues to understanding and help you make connections across concepts. NEW UPDATED content reflects the latest research evidence and national and international practice guidelines. For each textbook series, there is a description of the materials and reviews of the student edition, the process skills in the student edition, the teachers edition, the laboratory manual, and the teachers edition of the laboratory manual. Factual inaccuracies in the materials are noted. CW
