the world differently from other people. It is typically characterized by a lack of social understanding, a limited ability to have a reciprocal conversation, and an intense interest in a particular subject.<sup>3</sup> Asperger was the first to describe autism, and he observed that the children had social difficulties and unusual social abilities. He believed that the condition was due to genetic or neurological factors rather than psychological or environmental ones.<sup>4</sup> When a child is referred for a diagnostic assessment, they may have traveled along one of several different diagnostic pathways. The average age for a diagnosis of a child with Asperger's syndrome is between 8 and 11 years.

**The Complete Guide to Asperger's Syndrome** Tony Attwood, 2007. A guide to Asperger's syndrome describes what it is and how it is diagnosed, along with information on such topics as bullying, emotions, language, movement, cognitive ability, and long-term relationships.
