Educational Entrepreneurship Today Frederick M. Hess, Michael Q. McShane, 2021-03-04 In *Educational Entrepreneurship Today* Frederick M. Hess and Michael Q. McShane assemble a diverse lineup of high profile contributors to examine the contexts in which new initiatives in education are taking shape. They inquire into the impact of entrepreneurship on the larger field including the development and deployment of new technologies and analyze the incentives, barriers, opportunities, and tensions that support or constrain innovation. Over the past decade, entrepreneurship has moved from the periphery to the center of education reform. Policy measures, philanthropic support, and venture capital increasingly promote initiatives that drive innovation within and outside the traditional education sector. These initiatives have included spectacular successes like Khan Academy, Teach For America, and Wireless Generation, as well as highly visible failures like the InBloom data warehouse. *Educational Entrepreneurship Today* offers critical perspectives on the impact of entrepreneurship and also includes lessons from leading entrepreneurs in which they use case studies drawn from their own experience to illustrate the realities of leading disruptive change in education and pose guiding questions for the next generation of innovators. In a time of increasing polarization around education policy, this timely, frank, and insightful volume shows how we can begin to create systems in which entrepreneurial ideas and fresh thinking are welcomed constructively, employed, and held accountable for the public good.

The Math Pact, Middle School Sarah B. Bush, Karen S. Karp, Barbara J. Dougherty, 2020-09-19 A schoolwide solution for students' mathematics success. Do you sometimes start to teach a mathematics concept and feel like you're staring at a sea of bewildered faces? What happens when you discover students previously learned a calculation trick or a mnemonic that has muddled their long-term understanding? When rules seem to change from year to year, teacher to teacher, or school to school, mathematics can seem like a disconnected mystery for students. Clear up the confusion with a Mathematics Whole School Agreement. Expanded from the highly popular *Rules that Expire* series of NCTM articles, this essential guide leads educators through the collaborative, step-by-step process of establishing a coherent and consistent learner-centered and equitable approach to mathematics instruction. Through this work, you will identify, streamline, and become passionate about using clear and consistent mathematical language, notations, representations, rules, and generalizations within and across classrooms and grades. Importantly, you'll learn to avoid rules that expire, tricks that may seem to help students in one grade but hurt in the long run. Features of this book include abundant grade-specific examples, effective working plans for sustainability, barrier-busting tips to do and try it out, practical templates and checklists, PLC prompts and discussion points. When teachers unite across grades, students hit the ground running every year. Take the next step together as a team and help all your students build on existing understanding to find new success and, most importantly, love learning and doing mathematics.
