

Midrange Climate Change in the Arctic Circle

Recent Arctic climate change has attracted considerable attention, and the Arctic has been characterized as the "canary in the coal mine" for global climate change. However, the Arctic is not the only region where climate change is occurring. In fact, climate change is occurring in many regions of the world, and the Arctic is just one of the regions where the changes are most pronounced. This paper examines the midrange climate change in the Arctic circle, and the implications for the region's environment and society.

1. Introduction

- 1.1. The Arctic region is the northernmost part of the Earth, and is characterized by cold temperatures and long winters.
- 1.2. The Arctic region is home to a variety of indigenous peoples, and is an important area for research and exploration.

 Studies *Chicago Neighborhoods and Suburbs* Ann Durkin Keating, 2008-11-15 Which neighborhood It s one of the first
 questions you re asked when you move to Chicago And the answer you give be it Bucktown Bronzeville or Bridgeport can
 give your inquisitor a good idea of who you are especially in a metropolis with so many different neighborhoods and suburbs
 to choose from Many of us know little of the neighborhoods beyond those where we work play and live This is particularly
 true in Chicagoland a region that spans over 4 400 square miles and is home to more than 9 5 million residents Now
 historian Ann Durkin Keating s compact guide drawn largely from the bestselling Encyclopedia of Chicago brings the history
 of Chicago neighborhoods to life Back cover **Harvey's Weekly** ,1921 **Governance in Transition** Ján Buček, Andrew
 Ryder, 2015-04-15 This book looks at experience in government restructuring and devolution from a variety of national and
 international perspectives both within the European Union and elsewhere focusing on lessons learned and ways forward
 Since the 1980s there has been a global trend to give more power to local governments Even in Korea and the United
 Kingdom the most centralised countries in the OECD local government powers have increased with substantial economic
 benefits Within the European Union the principle of subsidiarity has enshrined the idea of devolution New member states
 particularly in central and eastern Europe have significantly created new and self sufficient local and regional governments
 However this process has been complicated Devolution is not a panacea in its own right and need not lead to economic
 growth While it can encourage savings through collaboration it can also lead to confused lines of authority and can
 complicate policy formation and implantation Devolution can strain local budgets forcing local governments to rely on their
 own sources of finance rather than central government transfers Suburbanisation rural depopulation the growth of some
 regions and the decline of others have raised new problems particularly related to inter governmental cooperation among
 local governments and different levels of government In many cases an increased number of governments has increased
