Ethnomethodology and Conversation Analysis have made major inroads into the disciplines that make up the social sciences. Although commonly run together under the title of EMCA, what their relationship is to one another remains as elusive as the relationship between their respective founders Harold Garfinkel and Harvey Sacks. This book clarifies the nature of these relationships, demonstrating that Harvey Sacks' studies of the sequential organisation of conversation are the cardinal example of what Garfinkel described as an ethnomethodological alternative to traditional social science. However, over the decades that have passed since Garfinkel developed ethnomethodology, several confusions have arisen as to what he meant. The author argues that these have resulted in a blunting of Garfinkel's original intentions, which compromise the adequacy of ethnomethodological description. In response, this book shows how Sacks' considerations of adequacy can ground ethnomethodology as a natural observational science that redirects it towards developing further coherent and precisely circumscribed bodies of work to those of Sacks' own coherent and precisely circumscribed studies. It will appeal to both new and existing scholars of ethnomethodology and conversation analysis, as well as those with interests in social theory, methodology, and those who have taken up the relevance of conversation analysis for their research and are interested in the ethnomethodological heritage of conversation analysis.

Harvey Sacks David Silverman, 1998

Harvey Sacks's early death in 1975 robbed the social sciences of one of its most original thinkers. Although he published relatively little in his lifetime, his lectures and papers were enormously influential in sociology and sociolinguistics, and they played a major role in the development of ethnomethodology and conversation analysis. The recent publication of Sacks's *Lectures on Conversation* has provided an excellent opportunity for a wide-ranging reassessment of his contribution. In this new book, David Silverman provides a clear introduction to Sacks's work and reassesses its value for sociology, linguistics, anthropology, and psychology. Using a variety of examples, he explains Sacks's ideas on method, language, and talk interaction. He argues that Sacks's work offers a highly original perspective on language and social life and raises fundamental questions for the social sciences, questions which after more than twenty years remain vitally important and largely unanswered. Written in a lively and accessible way, this book will be of particular interest to students of sociology, sociolinguistics, social theory, and method, but it will also be of interest to students and researchers in anthropology, psychology, and related disciplines.

Talk and Practical Epistemology Jack Sidnell, 2005-01-01

Drawing on the methods of conversation analysis and ethnography, this book sets out to examine the epistemological practices of Indo-Guyanese villagers as these are revealed in their talk and daily conduct. Based on over eighty-five hours of conversation recorded during twelve months of ethnographic fieldwork, the book describes

both the social distribution of knowledge and the villagers methods for distinguishing between fact and fancy knowledge and belief through close analyses of particular encounters The various chapters consider uncertainty and expertise in advice giving the cultivation of ignorance in an attempt to avoid scandal and the organization of peer groups through the display of knowledge in the activity of reminiscing local history An orienting chapter on questions and an appendix provide an introduction to conversation analysis The book makes a contribution to linguistic anthropology conversation analysis and cross cultural pragmatics The conclusion discusses the implications of the analysis for current understanding of practice knowledge and social organization in anthropology and neighboring disciplines

Narratives Michael G. W. Bamberg, Molly Andrews, 2004-01-01 Counter narratives only make sense in relation to something else that which they are countering The very name identifies it as a positional category in tension with another category But what is dominant and what is resistant are not of course static questions but rather are forever shifting placements The discussion of counter narratives is ultimately a consideration of multiple layers of positioning The fluidity of these relational categories is what lies at the center of the chapters and commentaries collected in this book The book comprises six target chapters by leading scholars in the field Twenty two commentators discuss these chapters from a number of diverse vantage points followed by responses from the six original authors A final chapter by the editor of the book series concludes the book
