Annabhajula J. C. Bose, 2022-05-10 Economics is the strangest and most dubious as also frustrating animal of social sciences and humanities The debate on what it is and what its strengths and weaknesses are in understanding and changing the economy and society for the better is never ending This book cuts through this noise for econ undergrads with social concerns It is crafted to be stuffed with peripatetic hops skips and intellectual and emotional jumps about the nature and character of the brain circuits of economics in terms of its methodological political sociological anthropological historical feminist ethical ecological spiritual literary technical corporate and other underpinnings Diverse stories are told as alerts or nudges for the undergrads who as aspirant youth have in general hyperbolic discounting attitude towards social change The mind and heart of the undergrad reading this book will hopefully be ignited so as to endeavour to find out the purpose of economic education and how economics should be learnt in order to rectify the failures of our current socio economic system The seriously academic undergrad may also be inspired to pursue the long range objective of doing integrated studies and research for maximised understanding and holistic policy making which is of course easier to say than do The Oxford Handbook of Employment Relations Adrian Wilkinson, Geoffrey Wood, Richard Deeg, 2014-03-13 There have been numerous accounts exploring the relationship between institutions and firm practices However much of this literature tends to be located into distinct theoretical traditional silos such as national business systems social systems of production regulation theory or varieties of capitalism with limited dialogue between different approaches to enhance understanding of institutional effects Again evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature often founded on macro data and with only limited attention being accorded to internal diversity and details of actual practice The Handbook aims to fill this gap by bringing together an assembly of comprehensive

and high quality chapters to enable understanding of changes in employment relations since the early 1970s Theoretically based chapters attempt to link varieties of capitalism business systems and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the subject providing frameworks and empirical evidence for understanding trends in employment relations in different parts of the world Most notably the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract its implementation and related questions of work organization It will be useful to academics and students of industrial relations political economy and management

The relationship between music and language Lutz Jäncke, Traditionally music and language have been treated as different psychological faculties This duality is reflected in older theories about the lateralization of speech and music in that speech functions were thought to be localized on the left and music functions on the right hemisphere But with the advent of modern brain imaging techniques and the improvement of neurophysiological measures to investigate brain functions an entirely new view on the neural and psychological underpinnings of music and speech has evolved The main point of convergence in the findings of these new studies is that music and speech functions have many aspects in common and that several neural modules are similarly involved in speech and music There is also emerging evidence that speech functions can benefit from music functions and vice versa This new research field has accumulated a lot of new information and it is therefore timely to bring together the work of those researchers who have been most visible productive and inspiring in this field and to ask them to present their new work or provide a summary of their laboratory s work **Efficiency and**
