Homeland Security Intelligence Mark A. Randol, 2008 This report provides a potential conceptual model of how to frame HSINT including geographic structural statutory and holistic approaches Given that state local tribal and private sector officials play such an important role in HSINT the holistic model one not constrained by geography or levels of government strikes many as the most compelling The report argues that there is in effect a Homeland Security Intelligence Community HSIC Although the HSIC s members are diffused across the nation they share a common counterterrorism interest The proliferation of intelligence and information fusion centers across the country indicate that state and local leaders believe there is value to centralizing intelligence gathering and analysis in a manner that assists them in preventing and responding to local manifestations of terrorist threats to their people infrastructure and other assets At the policy and operational levels the communication and integration of federal HSINT efforts with these state and local fusion centers will likely remain an important priority and future challenge

Homeland Security Intelligence, 2006 Although the activities involved in homeland security intelligence HSINT itself are not new the relative importance of state local and private sector stakeholders the awareness of how law enforcement information might protect national security and the importance attached to homeland security intelligence have all increased substantially since the events of September 11 2001 There are numerous intelligence collection disciplines through which the U S Intelligence Community IC collects intelligence to support informed national security decision making at the national level and the allocation of tactical military and law enforcement resources at the local level The collection disciplines are generally referred to as those which fall within national technical means or nontechnical means Technical means include signals intelligence SIGINT measurement and signatures intelligence MASINT and imagery intelligence IMINT Non technical means include human intelligence HUMINT and open source intelligence OSINT Each of these collection disciplines is source specific that is a technical platform or human source generally managed by an agency or mission manager collects intelligence that is used for national intelligence purposes HSINT however is generally not source specific as it includes both national technical and non technical means of collection For example HSINT includes human intelligence collected by federal border security personnel or state and local law enforcement officials as well as SIGINT collected by the National Security Agency Reasonable individuals can differ therefore with respect to the question of whether HSINT is another collection discipline or whether homeland security is simply another purpose for which the current set of collection disciplines is being harnessed Homeland security information as statutorily defined pertains directly to 1 terrorist intentions and capabilities to

attack people and infrastructure within the United States and 2 U S abilities to deter prevent and respond to potential terrorist attacks This report provides a potential conceptual model of how to frame HSINT including geographic structural statutory and holistic approaches Given that state local tribal and private sector officials play such an important role in HSINT the holistic model one not constrained by geography or levels of government strikes many as the most compelling The report argues that there is in effect a Homeland Security Intelligence Community HSIC While this community may not necessarily be a useful construct from a management perspective it is nevertheless a community as traditionally defined Although the HSIC s members are diffused across the nation they share a common counterterrorism interest The proliferation of intelligence and information fusion centers across the country indicate that state and local leaders believe there is value to centralizing intelligence gathering and analysis in a manner that assists them in preventing and responding to local manifestations of terrorist threats to their people infrastructure and other assets At the policy and operational levels the communication and integration of federal HSINT efforts with these state and local fusion centers will likely remain an important priority and future challenge This report will not be updated
