composed over two centuries alongside a narrative account of elaborate courtly festivities centered on a week long tournament Elizabeth Eva Leach explores two distinct but related lines of inquiry first why the lyric tradition of courtly love had such a long and successful history in Western European culture and second why the songs in the Bodleian manuscript would have been so important to the book s compilers owners and readers The manuscript s lack of musical notation and authorial attributions make it unusual among Old French songbooks its arrangement of the lyrics by genre invites inquiry into the relationship between this long musical tradition and the emotional and sexual lives of its readers Combining an original account of the manuscript's contents and their likely social milieu with in depth musical and poetic analyses Leach proposes that lyrics whether read or heard aloud provided a fertile means of propagating and enabling various sexual scripts in the Middle Ages Drawing on musicology literary history and the sociology and psychology of sexuality Medieval Sex Lives presents a provocative hypothesis about the power of courtly songs to model inspire and support sexual behaviors and fantasies Monumental cares Mechtild Widrich, 2023-01-31 Monumental cares rethinks monument debates site specificity and art activism in light of problems that strike us as monumental or overwhelming such as war migration and the climate crisis The book shows how artists address these issues from Chicago and Berlin to Oslo Bucharest and Hong Kong in media ranging from marble and glass to postcards graffiti and re enactment A multidirectional theory of site does justice to specific places but also to how far away audiences see them What emerges is a new ethics of care in public art combined with a passionate engagement with reality harking back to the realist aesthetics of the nineteenth century Familiar questions can be answered anew what to do with monuments particularly when they are the products of terror and require removal modification or recontextualisation And can art address the monumental concerns of our present **Spatial Cultures** Sam Griffiths, Alexander von Lünen, 2016-06-10 What is the relationship between how cities work and what cities mean Spatial Cultures Towards a New Social Morphology of Cities Past and Present announces an innovative research agenda for urban studies in which themes and methods from urban history social theory and built environment research are brought into dialogue across disciplinary and chronological boundaries The collection confronts the recurrent epistemological impasse that arises between research focusing on the description of material built environments and that which is concerned primarily with the people who inhabit govern and write about cities past and present A reluctance to engage substantively with this issue has been detrimental to scholarly efforts to understand the urban built environment as a meaningful agent of human social experience Drawing on a wide range of historical and contemporary urban case studies as well as a selection of theoretical and methodological reflections the contributions to this volume seek to historically geographically and architecturally contextualize diverse spatial practices including movement encounter play procession and neighbourhood The aim is to challenge their tacit treatment as universal categories in much writing on cities and to propose alternative research possibilities with implications as much for urban design thinking as for history and the social sciences Unboxed Gordon
