Eshiamwata, Jean-Marie Gregoire, Bernard K. Kirui, Andrea Lupi, Ilaria Palumbo, Jean-François Pekel, 2013-10-22 Monitoring vegetation dynamics and land cover change in Kenya are essential for the sustainable management of natural resources and biodiversity conservation. However, accurate status of seasonal variation in vegetation and long term land cover change data valid at the regional and country level generally do not exist or are hard to obtain. Here we describe the various ecological regions of Kenya and the associated rainfall and land cover patterns of each ecological zone. This includes the use of low resolution satellite data time series to characterise for each ecoregion and land cover type the interannual variability of the vegetation cycle including the start, mid and end of the growing season. Seasonal variation in vegetation phenology is mapped to highlight the areas of greatest interannual variation and compared to rainfall patterns over the focal study period. Statistical estimates of land cover change are produced for six broad classes for the years 1990, 2000 and 2010 based on detailed land cover change assessed by a systematic sampling of high resolution satellite imagery. Rates of change for Kenya are presented and discussed in light of the low resolution time series analysis. Results highlight information on land cover change processes such as vegetation dynamics and deforestation. These are discussed within the context of the drivers of changes to the natural ecosystem, their potential impact on land availability for human activities such as agriculture and logging for timber and fire wood production on the one side and habitat and biodiversity conservation on the other side. Finally, biodiversity and habitat value ecosystems and threats are analysed for Kenya's conservation and protected areas so as to identify the status of and pressures on the country's protected areas. Six indicators of species irreplaceability, habitat irreplaceability and the level of perceived threat to a protected area's habitat and species from agriculture and human population are analysed. In addition, high resolution satellite images taken over conservation areas are used for assessing land cover changes inside protected areas and in the surrounding 20km buffer zone. The results show the importance and effectiveness of protected areas in reducing the loss of natural vegetation and hence protecting the habitats and biodiversity.

Urban Environments in Africa Garth Myers, 2016-02-24 Africa's urban population is growing rapidly, raising numerous environmental concerns. Urban areas are often linked to poverty as well as power and wealth and hazardous and unhealthy environments as the pace of change stretches local resources. Yet there are a wide range of perspectives and possibilities for political analysis of these rapidly changing environments. Written by a widely respected author, this important book will mark a major new step forward in the study of Africa's urban environments. Using innovative research including fieldwork, data map analysis, place name study, interviewing and fiction, the book explores environmentalism from a variety of perspectives, acknowledging the clash between Western planning mind sets pursuing the goal of sustainable development and the lived realities of residents of often poor informal settlements. The book will be valuable to advanced undergraduate and graduate level courses in geography, urban studies, development studies, environmental studies and African studies. **Building Global Infrastructure** Dale S. Rothman, Mohammad T. Irfan, Barry B. Hughes, Eli Margolese-Malin, Jonathan D.

Moyer,2015-12-03 Building Global Infrastructure is the fourth in a series of volumes Patterns of Potential Human Progress that uses the International Futures IFs simulation model to explore prospects for human development how development appears to be unfolding globally and locally how we would like it to evolve and how better to assure that we move it in desired directions Earlier volumes addressed the reduction of global poverty the advance of global education and the improvement of global health Volume 4 sets out to tell the story of the future of global infrastructure The approach used in this book focuses on the question of whether individual societies will be able to meet future infrastructure demands Related questions include the following What is the range of realistically conceivable futures for infrastructure considering both demand and supply How are the demands for infrastructure balanced with the ability to meet these demands thereby linking the physical and financial treatment of infrastructure What are the effects of providing for infrastructure on issues such as economic productivity and health Advances in Environmental Monitoring and Assessment Suriyanarayanan

Sarvajayakesavalu,2019-06-26 The book Advances in Environmental Monitoring and Assessment is a collection of the latest research techniques on environmental monitoring and assessments I believe that the information contained in this book will enhance the skills of environmental scientists and decision makers and contribute to the exchange of best practices for developing and implementing optimum methods for environmental assessment and management **Hydrology and Water**

Resources Management in Arid, Semi-Arid, and Tropical Regions Ondieki, Christopher Misati,Kitheka, Johnson Utu,2019-06-28 Hydrology is a key influence on water security environmental sustainability agricultural production energy and transport especially in unique environments such as arid regions and the tropics where degradation issues on water and land can threaten the livelihoods of poor communities With implications in urbanization landscape architecture and sanitation enhancing the practice of water use management and planning is imperative for the sustainable development of these regions Hydrology and Water Resources Management in Arid Semi Arid and Tropical Regions is an essential research publication that seeks to improve scientific understanding and sharing of data in hydrology and integrated water resources management of arid semi arid and tropical regions in order to enhance water governance and alleviate reduction in the vulnerability of water resources systems to global changes Featuring a wide range of topics such as hydrometeorology sustainable development and climate change this book is ideal for researchers technology developers academicians policymakers government officials and students *Africa Water Atlas* United Nations Environment Programme,2010 This

Africa Water Atlas is a visual account of Africa s endowment and use of water resources revealed through 224 maps and 104 satellite images as well as some 500 graphics hundreds of compelling photos plus a brief profile of the water situation in every country These visual elements vividly illustrate a succinct narrative describing and analysing Africa s water issues and exemplifying them through the judicious use of case studies The Atlas tells the paradoxical story of a continent with adequate renewable water resources but unequal access because the water is either abundant or scarce depending on the

season or the place it explores the opportunities to develop Africa's untapped water resources and human capacities to deliver safe drinking water and sanitation services to achieve the water related Millennium Development Goals As well as hydropower and irrigation services that help support livelihoods and boost economic development *Biological Extinction* Partha Dasgupta, Peter Raven, Anna McIvor, 2019-09-05 Questions why species are becoming extinct and how we can protect the natural world on which we all depend Christian Faith and Environmental Stewardship Daniel K. Lagat, 2019-03-15 This book covers the contribution of Christianity in the care stewardship and management of the environment It uses ideas from the logical position of a Christian created in God's image redeemed by God and given responsibility to subdue and keep the earth arguing that a Christian has the responsibility and mandate to care for the environment It shows that successful stewardship happens when a Christian is aware of God's intention for creation exerts effort to increase it and is expected to give an account to God for their actions toward it The book presents environmental concerns in Kenya as an opportunity for change describing situations and why they could become opportunities for change Seven worldviews are presented that discourage Christians who want to do environmental stewardship and Christian theological doctrines are discussed that could be used to cause ecclesial participation in environmental stewardship Finally the book envisions a Conserving Church with specific activities the church can do to successfully influence people to do environmental stewardship **Land Degradation and Socio-Economic Development** Padmini Pani, 2020-05-19 This book offers an overview of recent literature on land degradation and its interrelationship with socio economic development processes in the developing world It provides an in depth analysis of land degradation as a physical process with an emphasis on the local and regional scales The volume contains a detailed case study of ravine formation processes in the Chambal valley a unique but least studied part of the world Using multi scale and multi disciplinary approaches and combining spatial socio economic data with remote sensing data this book provides an in depth analysis of the causes and implications of land degradation *Birth of a New Earth* Adrian Parr, 2017-10-24 In response to unprecedented environmental degradation activists and popular movements have risen up to fight the crisis of climate change and the ongoing devastation of the earth The environmental movement has undeniably influenced even its adversaries as the language of sustainability can be found in corporate mission statements government policy and national security agendas However the price of success has been compromise prompting soul searching and questioning of the politics of environmentalism Is it a revolutionary movement that opposes the current system Or is it reformist changing the system by working within it In Birth of a New Earth Adrian Parr argues that this is a false choice calling for a shift from an opposition between revolution and incremental change to a renewed collective imagination Parr insists that environmental destruction is at its core a problem of democratization and decolonization It requires reckoning with militarism market fundamentalism and global inequality and mobilizing an alternative political vision capable of freeing the collective imagination in order to replace an apocalyptic mindset frozen by the spectacle of violence Birth of a

New Earth locates the emancipatory work of environmental politics in solidarities that can bring together different constituencies fusing opposing political strategies and paradigms by working both inside and outside the prevailing system She discusses experiments in food sovereignty collaborative natural resource management and public interest design initiatives that test new models of economic democratization Ultimately Parr proclaims environmental politics is the refusal to surrender life to the violence of global capitalism corporate governance and militarism This defiance can serve as the source for the birth of a new earth *Sustainable Intensification* Jules N. Pretty, Stella Williams, Camilla Toulmin, 2012-06-25 Continued population growth rapidly changing consumption patterns and the impacts of climate change and environmental degradation are driving limited resources of food energy water and materials towards critical thresholds worldwide These pressures are likely to be substantial across Africa where countries will have to find innovative ways to boost crop and livestock production to avoid becoming more reliant on imports and food aid Sustainable agricultural intensification producing more output from the same area of land while reducing the negative environmental impacts represents a solution for millions of African farmers This volume presents the lessons learned from 40 sustainable agricultural intensification programmes in 20 countries across Africa commissioned as part of the UK Government's Foresight project Through detailed case studies the authors of each chapter examine how to develop productive and sustainable agricultural systems and how to scale up these systems to reach many more millions of people in the future Themes covered include crop improvements agroforestry and soil conservation conservation agriculture integrated pest management horticulture livestock and fodder crops aquaculture and novel policies and partnerships *Encyclopedia of Quaternary Science* Cary Mock, 2013-03-25 The second revised edition of the Encyclopedia of Quaternary Science Four Volume Set provides both students and professionals with an up to date reference work on this important and highly varied area of research There are lots of new articles and many of the articles that appeared in the first edition have been updated to reflect advances in knowledge since 2006 when the original articles were written The second edition will contain about 375 articles written by leading experts around the world This major reference work is richly illustrated with more than 3 000 illustrations most of them in colour Research in the Quaternary sciences has advanced greatly in the last 10 years especially since topics like global climate change geologic hazards and soil erosion were put high on the political agenda This second edition builds upon its award winning predecessor to provide the reader assured quality along with essential updated coverage Contains 357 broad ranging articles 4310 pages written at a level that allows undergraduate students to understand the material while providing active researchers with a ready reference resource for information in the field Facilitates teaching and learning The first edition was regarded by many as the most significant single overview of Quaternary science ever yet Editor in Chief Scott Elias has managed to surpass that in this second edition by securing even more expert reviews whilst retaining his renowned editorial consistency that enables readers to navigate seamlessly from one unfamiliar topic to the next **Aquatic Biomes** Germano Leão
