Libraries and Key Performance Indicators Leo Appleton, 2017-07-27. *Libraries and Key Performance Indicators: A Framework for Practitioners* explores ways by which libraries across all sectors can demonstrate their value and impact to stakeholders through quality assurance and performance measurement platforms including library assessment, evaluation methodologies, surveys, and annual reporting. Whilst several different performance measurement tools are considered, the book's main focus is on one tool in particular: Key Performance Indicators (KPIs). KPIs are increasingly being used to measure the performance of library and information services; however, linking KPIs to quality outcomes such as impact and value can prove very difficult. This book discusses in detail the concept of KPIs in the broader context of library assessment and performance measurement. Through reviewing some of the applied theory around using KPIs, along with harvesting examples of current best practices in KPI usage from a variety of different libraries, the book demystifies library KPIs, providing a toolkit for any library to be used in setting meaningful KPIs against targets, charters, service standards, and quality outcomes. Provides an overview of performance measurement tools for libraries. Discusses KPIs in a broad context. Offers an understanding of reporting, monitoring, and acting upon KPI data. Provides best practice examples of Key Performance Indicators (KPIs) in libraries. Includes practical and reusable examples of KPIs that can be applied in local contexts: a toolkit approach.

Developmental Local Government Jaap De Visser,2005 This book concerns the role of the state in achieving development In many developing countries conventional wisdom concluded that development is best achieved through a centralised development strategy The failure of this centralised development strategy has brought about the emergence of decentralisation to local government as one of the means to turn the tide of underdevelopment This book presents decentralisation not only as a manifestation of good governance but also as an indispensable tool towards development The central question however is the following how should the transitional state convert this into constitutional and legal arrangements The author proposes a model for capturing the developmental role of local government in institutional arrangements The new design for local government put forward in South Africas 1997 Constitution is based on the notion that local government should be the epicentre of development This has prompted the author to use this South African concept as well as the first experiences with the implementation of the new local government dispensation as a case study The importance of the book thus lies in the fact that it produces an institutional model for developmental local government that is not only based on development and decentralisation theories but is also tested in practice It is hoped that those with an interest in the role of the state in development will find the arguments and conclusions useful The book also provides a comprehensive overview of the South African design for local government which is of interest to lawyers policy makers and other parties involved in the implementation of the South African decentralisation strategy Jaap de Visser teaches public law at the Law Faculty of Utrecht University in the Netherlands Until the end of 2002 he worked as a researcher for the Community Law Centre University of the Western Cape specialising in local government law
