**Resources in Education** , 2001-10      *Thomas Kuhn's Revolutions* James A. Marcum, 2015-10-22 This new edition

of Thomas Kuhn's *Revolution* marks the 50th anniversary of the publication of Kuhn's most influential work. Drawing on the rich archival sources at MIT and engaging fully with current scholarship, James Marcum provides the historical background to the development of *The Structure of Scientific Revolutions*, exploring the shift Kuhn makes from a historical to an evolutionary philosophy of science and examining Kuhn's legacy in depth. Marcum answers key questions: What exactly was Kuhn's historiographic revolution and how did it come about? Why did it have the impact it did? What will its future impact be for both academia and society? Marcum's answers build a new portrait of Kuhn: his personality, his pedagogical style, and the intellectual and social context in which he practiced his trade. *Thomas Kuhn's Revolution* shows how Kuhn transcends the boundaries of the philosophy of science, influencing sociologists, economists, theologians, and even policy makers and politicians. This is a comprehensive historical and conceptual introduction to the man who changed our understanding of science.

**Technical Reports Awareness Circular : TRAC.** ,1987-08      **Handbook of Writing and Text Production**

Eva-Maria Jakobs, Daniel Perrin, 2014-02-27 Writing matters and so does research into real life writing. The shift from an industrial to an information society has increased the importance of writing and text production in education in everyday life and in more and more professions in the fields of economics and politics, science and technology, culture and media. Through writing we build up organizations and social networks, develop projects, inform colleagues and customers, and generate the basis for decisions. The quality of writing is decisive for social resonance and professional success. This ubiquitous real life writing is what the present handbook is about. The *de Gruyter Handbook of Writing and Text Production* brings together and systematizes state-of-the-art research. The volume contains five sections focussing on I the theory and methodology of writing and text production research as well as on problem-oriented and problem-solving approaches related to II authors, III modes and media, IV genres, and V domains of writing and text production. Throughout the 21 chapters, exemplary research projects illustrate the theoretical perspectives from globally relevant research spaces and traditions. Both established and future scholars can benefit from the handbook's fresh approach to writing in the context of multimodal, multi-semiotic text production.

[Handbook of Epistemic Cognition](#) Jeffrey A. Greene, William A. Sandoval, Ivar Bråten, 2016-01-22 The *Handbook of Epistemic Cognition* brings together leading work from across disciplines to provide a comprehensive overview of an increasingly important topic: how people acquire, understand, justify, change, and use knowledge in formal and informal contexts. Research into inquiry, understanding, and discovery within academic disciplines has progressed from general models of conceptual change to a focus upon the learning trajectories that lead to expert-like conceptualizations, skills, and performance. Outside of academic domains, issues of who and what to believe and how to integrate multiple sources of information into coherent and useful knowledge have arisen as primary challenges of the 21st century. In six sections, scholars write within and across fields to focus and advance the role of epistemic cognition in education. With special attention to how researchers across disciplines can communicate and collaborate more effectively, this book will be an

invaluable resource for anyone interested in the future of knowledge and knowing Dr Jeffrey A Greene is an associate professor of Learning Sciences and Psychological Studies in the School of Education at the University of North Carolina at Chapel Hill Dr William A Sandoval is a professor in the division of Urban Schooling at the UCLA Graduate School of Education Information Studies Dr Ivar Br ten is a professor of Educational Psychology at the Faculty of Educational Sciences at the University of Oslo Norway      *NBS Special Publication* ,1968      **Transportation Systems Center Bibliography of Technical Reports; January - December 1978** J.
