Today roughly 2 billion people use the internet and its applications have flourished in number and importance This volume will examine the growth and geography of the internet from a political economy perspective Its central motivation is to illustrate that cyberspace does not exist in some aspatial void but is deeply rooted in national and local political and cultural contexts Toward that end it will invoke a few major theorists of cyberspace but apply their perspectives in terms that are accessible to readers with no familiarity with them Beyond summaries of the infrastructure that makes the internet possible and global distributions of users it delves into issues such as the digital divide to emphasize the inequalities that accompany the growth of cyberspace It also addresses internet censorship e commerce and e government issues that have received remarkably little scholarly attention particularly from a spatial perspective Throughout it demonstrates that in cyberspace place matters so that no comprehensive understanding of the internet can be achieved without considering how it is embedded within and in turn changes local institutional and political contexts Thus the book rebuts simplistic death of distance views or those that assert there is or can be a one size fits all cookie cutter model of the internet applicable to all times and places

**Mapping the Transnational World** Emanuel Deutschmann, 2022-01-25 A study of the structure growth and future of transnational human travel and communication Increasingly people travel and communicate across borders Yet we still know little about the overall structure of this transnational world Is it really a fully globalized world in which everything is linked as popular catchphrases like global village suggest Through a sweeping comparative analysis of eight types of mobility and communication among countries worldwide from migration and tourism to Facebook friendships and phone calls Mapping the Transnational World demonstrates that our behavior is actually regionalized not globalized Emanuel Deutschmann shows that transnational activity within world regions is not so much the outcome of political cultural or economic factors but is driven primarily by geographic distance He explains that the spatial structure of transnational human activity follows a simple mathematical function the power law a pattern that also fits the movements of many other animal species on the planet Moreover this pattern remained extremely stable during the five decades studied 1960 to 2010 Unveiling proximity induced regionalism as a major feature of planet scale networks of transnational human activity Deutschmann provides a crucial corrective to several fields of research Revealing why a truly global society is unlikely to emerge Mapping the Transnational World highlights the essential role of interaction beyond borders on a planet that remains spatially fragmented

Europe and World Society Chris Rumford, Didem Buhari-Gulmez, 2017-10-02 Europe and World Society offers a distinctive

critical approach to understanding European transformations exploring both the progress and limitations of integration on various key policy areas such as agricultural policy education reform migration and external relations as well as the relationship between European regionalism and globalization Due to its innovative theoretical framework based on macro perspectives including World Polity Theory developed by Stanford sociologist John W Meyer this collection contributes to both the recent sociological turn in European studies and to the constructivist critiques of rational choice accounts of modern Europe At a time when the European integration project has been severely challenged by multiple economic political and social crises this book offers a timely global perspective that sheds light on the dynamism and multiplicity of the actors discourses and processes which underlie contemporary Europe The book s distinctive global approach allows it to move the debate beyond state and EU centrism and establish the missing link between Europe and its global context This book was published as a special issue of the Journal of Contemporary European Studies

**Human Resource Management** David G. Collings, Geoffrey Wood, Leslie T. Szamosi, 2018-08-15 Despite over three decades of debate around the nature of human resource management HRM its intellectual boundaries and its application in practice the field continues to be dogged by a number of theoretical and practical limitations Written by an international team of respected scholars this updated textbook adopts a critical perspective to examine the core management function of HRM in all its complexity including its darker sides Human Resource Management A Critical Approach opens with a critique of the very concept of HRM tracing its development over time and then systematically analyses the context of HRM practice of HRM and international perspectives on HRM New chapters commissioned for this second edition look at HRM and the issues of diversity migration global supply chains and economic crisis This textbook is essential reading for advanced and inquisitive students of HRM and for HRM professionals looking to deepen their understanding of the complexities of their field

*Teaching in a Networked Classroom* Jonathan Savage, Clive McGoun, 2015-06-05 The pace of technological change has made the immediate and long term future difficult if not impossible to predict Teachers are forced to imagine the world they are preparing their students to live in In this situation creativity becomes a vital resource for enabling uncertain futures to be embraced and an important attribute for students to have both for their learning and their employability in the future In this book the authors argue that creativity is a social and collaborative process that can be enhanced through online and digital technologies Filled with case studies and practical tasks it shows teachers how they can develop an approach to teaching and learning with digital technologies that is inherently social collaborative and creative Including case studies and practical examples of projects and lessons throughout the chapters cover Learning in a networked society An examination of sharing practices and how knowledge can be shared more effectively Potential pitfalls of virtual learning environments and public social networking sites Using digital media to plan schemes of work and lessons How to facilitate meaningful collaboration and discussion through digital media Creating online environments to enable students to share their understandings and learning Bringing together key ideas about

creativity collaborative learning and ICT in the classroom this timely book will be an invaluable resource for all teachers
