Making Of An Economic Superpower, The: Unlocking China's Secret Of Rapid Industrialization Yi Wen,2016-05-13 The rise of China is no doubt one of the most important events in world economic history since the Industrial Revolution Mainstream economics especially the institutional theory of economic development based on a dichotomy of extractive vs inclusive political institutions is highly inadequate in explaining China s rise This book argues that only a radical reinterpretation of the history of the Industrial Revolution and the rise of the West as incorrectly portrayed by the institutional theory can fully explain China s growth miracle and why the determined rise of China is unstoppable despite its current backward financial system and political institutions Conversely China s spectacular and rapid transformation from an impoverished agrarian society to a formidable industrial superpower sheds considerable light on the fundamental shortcomings of the institutional theory and mainstream blackboard economic models and provides more accurate reevaluations of historical episodes such as Africa s enduring poverty trap despite radical political and economic reforms Latin America s lost decades and frequent debt crises 19th century Europe s great escape from the Malthusian trap and the Industrial Revolution itself
