A Terrible Thing to Waste Harriet A. Washington, 2019-07-23 A powerful and indispensable look at the devastating consequences of environmental racism Gerald Markowitz and what we can do to remedy its toxic effects on marginalized communities Did you know Middle class African American households with incomes between 50 000 and 60 000 live in neighborhoods that are more polluted than those of very poor white households with incomes below 10 000 When swallowed a lead paint chip no larger than a fingernail can send a toddler into a coma one tenth of that amount will lower his IQ Nearly two of every five African American homes in Baltimore are plagued by lead based paint Almost all of the 37 500 Baltimore children who suffered lead poisoning between 2003 and 2015 were African American From injuries caused by lead poisoning to the devastating effects of atmospheric pollution infectious disease and industrial waste Americans of color are harmed by environmental hazards in staggeringly disproportionate numbers This systemic onslaught of toxic exposure and institutional negligence causes irreparable physical harm to millions of people across the country cutting lives tragically short and needlessly burdening our health care system But these deadly environments create another insidious and often overlooked consequence robbing communities of color and America as a whole of intellectual power The 1994 publication of *The Bell Curve* and its controversial thesis catapulted the topic of genetic racial differences in IQ to the forefront of a renewed and heated debate Now in *A Terrible Thing to Waste* award winning science writer Harriet A Washington adds her incisive analysis to the fray arguing that IQ is a biased and flawed metric but that it is useful for tracking cognitive damage She takes apart the spurious notion of intelligence as an inherited trait using copious data that instead point to a different cause of the reported African American white IQ gap environmental racism a confluence of racism and other institutional factors that relegate marginalized communities to living and working near sites of toxic waste pollution and insufficient sanitation services She investigates heavy metals neurotoxins deficient prenatal care bad nutrition and even pathogens as chief agents influencing intelligence to explain why communities of color are disproportionately affected and what can be done to remedy this devastating problem Featuring extensive scientific research and Washington's

sharp lively reporting A Terrible Thing to Waste is sure to outrage transform the conversation and inspire debate *All In Her Head* Misty Pratt, 2024-05-07 This provocative deeply personal book explores how women experience mental health care differently than men and lays out how the system must change for women to flourish Why are so many women feeling anxious stressed out and depressed and why are they not getting the help they need Over the past decade mood disorders have skyrocketed among women who are twice as likely to be diagnosed as men Yet in a healthcare system steeped in gender bias women's complaints are often dismissed their normal emotions are pathologized and treatments routinely fail to address the root causes of their distress Women living at the crossroads of racial economic and other identities face additional barriers How can we pinpoint what's wrong with women's mental health and what needs to change In *All in Her Head* science writer Misty Pratt embarks on a crucial investigation painting a picture of a system that is failing women on multiple levels Pratt who shares her own history of mental illness explores the stereotypes that have shaped how we understand and treat women's distress from the Ancient Greek concept of hysteria to today's self help solutions Weaving together science and women's personal stories *All in Her Head* debunks mental health myths and challenges misconceptions addressing the following questions When did normal emotions become symptoms of a disorder What are specific risk factors for common mental disorders that disproportionately affect women How did burnout become a women's disease What can we do to make peace with our moods and embrace the gifts of our emotions Pratt also tackles the thorny topic of medication taking a nuanced and evidence based approach Women who present at their doctor's office with depression anxiety or stress are often prescribed antidepressants as a first line treatment at least one in four American women are now taking these medications Antidepressants have a real effect that can be helpful for some individuals however Pratt persuasively argues that our current approach ignores the underlying causes of most women's depressive symptoms Today a rising movement of women is demanding better when it comes to mental health treatment Armed with the latest science insight from those who have been through the therapeutic system and enough humor to lighten the load *All in Her Head* provides women with hope and courage to reframe and reclaim their mental health **The American Medical Association on the Case for Teaching**

Racism Francis Kwarteng, 2021-04-26 The public lynching of George Floyd re-exposed the rotten underbelly of America and this together with the disproportionate impact of COVID 19 on Black and Brown communities the global Black Lives Matter protests and the racist xenophobic demagoguery of Donald Trump resurrected the old debates about medical racism race relations implicit bias vaccine nationalism vaccine imperialism structural inequality police brutality vaccine hesitancy unethical human experimentation vaccine diplomacy qualified immunity conspiracy theories and social justice Then in 2020 the American Medical Association formally declared racism a public health crisis defined racism as a social determinant of health and embraced the idea of medical schools teaching medical students about racism Alas the nursing curriculum is somewhat silent on these questions Decolonizing the nursing curriculum long overdue is therefore imperative This book

explores the question of decolonizing the nursing curriculum from the angles of postcolonial theory critiquing the Western literary canon American history literary criticism African literature cultural criticism Afrocentric theory democracy African American literature and critical race theory *Sanatana Dharma and Plantation Hinduism (Second Edition Volume 1)*

O'Rourke),2024-01-31 6 Vogue 2022 Gretchen Rubin The Advocate ,2005-01-18 The Advocate is a lesbian gay bisexual transgender LGBT monthly newsmagazine Established in 1967 it is the oldest continuing LGBT publication in the United States Mad in America Robert Whitaker,2019-09-10 An updated edition of the classic history of schizophrenia in America which gives voice to generations of patients who suffered through cures that only deepened their suffering and impaired their hope of recovery Schizophrenics in the United States currently fare worse than patients in the world s poorest countries In Mad in America medical journalist Robert Whitaker argues that modern treatments for the severely mentally ill are just old medicine in new bottles and that we as a society are deeply deluded about their efficacy The widespread use of lobotomies in the 1920s and 1930s gave way in the 1950s to electroshock and a wave of new drugs In what is perhaps Whitaker s most damning revelation Mad in America examines how drug companies in the 1980s and 1990s skewed their

studies to prove that new antipsychotic drugs were more effective than the old while keeping patients in the dark about dangerous side effects A haunting deeply compassionate book updated with a new introduction and prologue bringing in the latest medical treatments and trends *Mad in America* raises important questions about our obligations to the mad the meaning of insanity and what we value most about the human mind The Unread Mind Morris Rosenberg, 1992 Throughout history we have been intrigued and baffled by mental illness Our confusion is nowhere more apparent than in the ways we have dealt with the mentally ill We have tortured exiled and burned them at the stake Yet at other times we have supported cared for and nurtured them It is apparent that society has never quite known how to respond to the insane whether to punish them for their acts or to pity them for their sickness In an original look at the nature of mental illness and the distinction between sanity and insanity Morris Rosenberg rejects most psychiatric psychological and sociological theories Instead he defines insanity as role taking failure the inability to grasp the thoughts and emotions of other human beings According to Rosenberg we characterize a person's ideas and behaviors as insane when we are unable to put ourselves in his place or to see the world through his eyes If we can comprehend the reasons for a person's speech or action we think of it as sane if not we consider it insane He contends that it is society's confusion about the mentally ill its inability to penetrate the unread mind that actually defines mental illness His radical thesis that mental illness is characterized by society's response not the individual's action gives us a new way to look at a subject that has puzzled society for centuries *Media Madness*, 1997 Madness: A Very Short Introduction Andrew Scull, 2011-08-25 Andrew Scull examines the social historical and culturally variable response to madness over the centuries providing a provocative and entertaining examination of mental illness over more than two millennia Front cover flap
