Making the Most of Small Groups Debbie Diller, 2023-10-10 Author Debbie Diller turns her attention to small reading groups and the teacher's role in small group instruction. *Making the Most of Small Groups* Differentiation for All grapples with difficult questions regarding small group instruction in elementary classrooms such as How do I find the time? How can I be more organized? How do I form groups? How can I differentiate to meet the needs of all of my students? Structured around the five essential reading elements: comprehension, fluency, phonemic awareness, phonics, and vocabulary, the book provides practical tips, sample lessons, lesson plans, and templates, suggestions for related literacy work stations, and connections to whole group instruction. In addition to ideas to use immediately in the classroom, Diller provides an overview of relevant research and reflection questions for professional conversations.

Strategies that Work Stephanie Harvey, Anne Goudvis, 2007 Describes strategies teachers can use to promote reading comprehension in students from kindergarten through eighth grade and includes examples of student work, illustrations, and other reference tools.

The Big Book of Dyslexia Activities for Kids and Teens Gavin Reid, Nick Guise, Jennie Guise, 2018-10-18 Full of interesting and creative activities for children and young people aged 5-19 with dyslexia, this book is an essential guide for teachers and parents. Focusing on practical and accessible projects, the guide will cover key skills such as listening, memory, talking, and writing.

Teaching Kids to Think Critically Clifton Chadwick, 2014-09-12 This book is based on a simple series of psychological concepts. While ability to think has always been important, the knowledge economy significantly increases the demand for higher order thinking and problem solving abilities. Parents should take a much more active role in teaching their children to think. Early preschool years are critical because long term attitudes and early strategies are learned then. Approaches and perspectives on learning to think can be clearly communicated to parents in ways which will make it possible for them to use the correct strategies to stimulate their students to think more clearly and critically. There are five elements involved in good logical, critical, and creative thinking:

- 1 The skills involved in effective, efficient, and lasting learning, or commonly referred to as cognitive processing strategies.
- 2 The mastery of logic and structure of what is being learned.
- 3 Awareness of what one knows and does not know, and how one knows and how one thinks.
- 4 The standards or guidelines for the validity and reliability of what one knows, called intellectual standards.
- 5 The knowledge and skills involved in critical thinking and solving problems in different subjects or domains.
