Long ago, many Irish people made their new home in America. They soon began a tradition of honoring St. Patrick, the patron saint of Ireland who helped the Irish people. They celebrated the Irish culture with music, food, dance, and the "wearing of the green." Even water is dyed green for the day. Shamrocks, pots of gold and leprechauns are all symbols of St. Patrick's Day. Be sure to wear green on March 17<sup>th</sup> or you may get pinched!

Mount St. Helens, a volcano in Washington State, has long been called the "Smoking Mountain" by Native Americans. In 1980, this volcano erupted, blowing the top off the mountain, killing almost all plant and animal life, and melting snow and ice from glaciers. But small plants under the snow survived, soon the wind began to blow in small creatures such as beetles and spiders, and fish have slowly returned to the waters. New trees are growing once again from buried seeds and roots.

Honeybees live and work in colonies. The queen bee, workers and drones all have important jobs. Worker bees gather pollen from flowers, fruits and vegetables to make their honey. They also spread pollen to other plants which helps them grow. One-third of all the food in the world is pollinated by honeybees, but the bees are beginning to disappear because of "colony collapse." Scientists are not sure what causes this and worry that too many honeybees will disappear.

Eleven-year old Frank Epperson accidentally invented the popsicle when he made a fruit flavored drink, stirred it with a stick, and left it outside on a cold winter night. The next day, he had fun showing it to his friends, and then forgot all about it. But when Frank grew up, he began to think about his "frozen ice on a stick," and wondered if people would enjoy this unusual and delicious treat. So, he set up a business to make and sell his unexpected discovery.

Short, Harvey Henson, John R. McConnell, 2021-12-01 In an age where we are inundated with information the ability to discern verifiable information to make proper decisions and solve problems is ever more critical Modern science which espouses a systematic approach to making inferences requires a certain mindset that allows for a degree of comfort with uncertainty This book offers inspirations and ideas for cultivating the proper mindset for the studying teaching and practicing of science that will be useful for those new to as well as familiar with the field Although a paradigm shift from traditional instruction is suggested in the National Framework for K 12 science this volume is intended to help educators

develop a personal mental framework in which to transition from a teacher centered didactical approach to a student centered evidence guided curriculum While the topics of the book derive from currently published literature on STEM education as they relate to the National Framework for K 12 Science and the Three Dimensional science instruction embedded in the Next Generation Science Standards this book also examines these topics in the context of a new societal age posited as the Age of Inference and addresses how to make sense of the ever increasing deluge of information that we are experiencing by having a scientific and properly discerning mindset

**ENDORSEMENTS** This volume takes on one of the thorniest existential problems of our time the contradiction between the exponentially growing amount of information that individuals have access to and the diminished capacity of those individuals to understand it Its chapters provide the reader with an introduction to the relationship between knowledge science and inference needed new approaches to learning science in our new data rich world and a discussion of what we can and must do to reduce or eliminate the growing gap between the inference have s and have nots It is not too much to say that how we resolve the issues outlined in this volume will determine the future of our species on this planet Joseph L Graves Jr Professor of Biological Sciences North Carolina A we need the ability to draw sound inferences from the data Cultivating a scientific mindset requires fundamental changes to the way we teach and learn This important and well written volume shows how Ashok Goel Professor of Computer Science and Human Centered Computing Georgia Institute of Technology Editor of AI Magazine Founding Editor of AAAI s Interactive AI Magazine If you are a science teacher concerned about the implications of information overload analysis paralysis and intellectual complacency on our health economic future and democracy then I recommend this book Michael Svec Professor for Physics and Astronomy Education Furman University Fulbright Scholar to Czech Republic [Inference](#)
